A Historical Geography of New Orleans hease order on amazon.com by A. A. Character of the Canada and Canada 

#### Introduction

dilemma (də-'le-mə), n. a problem involving a difficult or unu'easant choice [which] will bring undesirable continuences

△ –Merr: m- Webster and Oxford Ladish dictionaries

Human experiences of ften play out as a sequence of greater and lesser a. Immas in which every difficult choice engenders unknowable consequences. Could making trainful in restment mow relieve our children of far greater expenditures in the future. Or might treating adday's minor inconveniences spawn major crises and corrow? Should a settlement be built on the safest site, despite its inconvenience? Or should explosive the most suategic situation, despite its risk? Should be remain in erolling marshes and contains centuries of training, or end our way of life and prove in land so that tog essive a stal restoration may begin?

Di'em as are as fascination as they are distrecting. Dile, maticiplates—cities, for example, that are important, et costly, strategic but dangerous, triun point and acroic—are among the most intriguing locales on Far 1.

What better place to contemplate the notion of historical and a orgraphical dilemma than New Orlean and coastal Louis and Described by geographer Peirce Lewis at the "inevitable city on the "impossible" s. 2, New Orl and comprises a litary of polemical decisions and dramatic transformations. From, the full spectrum of the him in experience seer is to manifest itself vividity in day for fearld a cryday cityscapes. A sity once routinely predicted to rank among the world's greatest is now foreseen by the walk of Francicane Katrina and in light of feroding coasts, sinking soils, and insing seas, to have no future whatsoever of two worlds characterize all of southeastern Louisiana now," reflected environmental law scholar of liver Franck, "they would be cotal uncertainty." So why would so many people for it to romain? "[B] ecause it' with a damned joy to not here."

Bien, I e's Dilemma prese 's sixty eicht article and essays on the historical geography of New Orleans. Not intended to be craditional history of political gures and legislative acts, the book seek. Or nswer bey question guiding the discipance of geography: What is the shape, form, and origine fithe the shall landscape? How have humans transfermed the landscape, and vice versa? How are phenomena distributed spatially, why, and how have the patterns charged through time? What distinguishes places from each other? How do people perceive place? What clues do we see in the present-day cityscape reflecting these questions? And how can geographical knowledge be used to restore and improve disturbed places? Most writings are new to Lois volume; others are updated derivations of my each over the past thirtien years.

As often happens, then writing about historical geography, the researcher must make certain structural decisions. Should time (history) serve as the volume's organizational vertebrae? Or should space (geography)? One must also choose between

breadth (comprehensiveness) and depth (analytical detail and approach).

I decided to organize the topics by the transformations and implications they wrought upon the lan Iscape: formation, settlement, urbanization, population, manipulation, humanization, devastation, and restoration. I chose also to take an indepth epis (a) appro a rather than a comprehension one that touches lightly on everything. A rest of "mine-wide in andeep" books about New Orleans currently bucked booksholves; what a discharge focused, critical, in depth studies. Relinquishing comprehensioness and many important topics must be left out. To atone for the essent of organization, Bienville's Dilamina begins with an expensive timeline of historical coents of a capability of a comprehensive chronology of local history: the timeline records selented historical events in a trends that helped create the urban lands apelied today.

Emerging a peatedly through at this volume is the claim of quenting. If it is appear, in Bien alles momentous decision regarding where to establish New Origins. It concludes tith the stories of level construction, canal engaged and expension, coased level construction, canal engaged and expension, canal engaged an

Problem end with solutions; an mmas monith choices. Southeastern outsiana must make excruciating choices legarding people, relture, and place if not to survive. Entangle I in those decisions are problems involving coastal restoration economic diverse. Attion, environme and sustainability, so and equity, and learning to live with risk. The geographer, I believe the approblems are solvable, so long as citizens muster the will to tackle the non-1 the courage to confront the dilemmas underlying them.

It is my hope that the requisite vilpower and valor will be sun. Anned through the reclization that these problems are not only solvable, but worth solving, and that the world would be a lesser place vithout New Seans.

### Acknowledgments

I wish to thanl the following institutions for access to the research materials, datasets, and analytical tools used in this volume: Louisiana Collection and Special Collection of the Early. A Historical Geography of New Orleans hease order on amazon.com by A. A. Character of the Canada and Canada 

Historical events of geographical significance in the New Orleans area

- Prehistoric Indigonous people occupy Mississippi deltaic plain and explore and veloit neurons of rulges, bayous, and bays. Inowledge of labyrinthine deltaic geography includes discovery of key shortcuts and portages between Collins of Mexico and Mississippi River.
- 1319-1543 Sp niards Annso Álvarez de Pireda, Pánfilo de Narváez, an He nando de Soto exp on lower Mississippi region; efforts lead to no lasting claims or lement out augment European knowledge of on If Coast Mississippi rever region. European diseases decimate indigen on populations following the Soto's expedition.
- Ni e y ars after Marque to and Joliet's exploration or opper Microsippi, French Canadian René Robert Cavelier, sieur a. La Solle sails do vir Mississer, i to Gulf of Mexico, confirming relationship among Sreat Laboriver, and sea. His claim of Miscossippi watershed asserts French cominion over one million square miles (1) Jorth America, etting stage for foundation of French colonies near river's mouth. La Salle's attende to return in 1634 ends in confusion and disaste, leaving France's Louis and claim idle for in Seen years.
- Le Moyne bestiners Iberville and Penville explore Gu'l Coast and lower rive region and explish Fort Maure passin present Jay Ocean' prings, Mississippi Expedition of found and colonical Louisiana signifies France's renewed interest in La Salle's 1682 claim, in Jarge part to Jay pit of the flands of Englis's (via migration from northeast and invasion from gull, and Spanish (via Mexico and F. of da).
- Biopyale rebuffs English Ligate Carc ina Gauc, from entering French Louisia. I. Incident (which gives "English Turn it name) demonstrates English interest in lower Mississippi Vancy and convinces Iberville of new does tablish fort on Mississippi River, and didition to coastal settlements. Natives show Frenchmen various shortcuts a nong gulf, lakes, and river, one of which Bienville later selects for New (Classis).
- Bienville founds Fort (e. Mississipp: (Fort de la Boula) near present-day Phoenix in Plaquemi. Se Parish. First European settlen of within present-day Louisiana gives Frer c'experience in settling Missis in a deltaic plain.
- Seat of colonial government is moved from Fort Yaurepas to new Mobile settlement, local I north of present-day Alab in a city of the same name. European population of lower Louisiana totals as out 140 subjects, strewn out

- between Mobile Bry and Mississippi River.
- Some Mobile ( olor) sts are granted land concessions at Bayou St. John. Wheat crop near bayous neadwaters fails, but effort puts area "on the map" as first European settlement in future New Orleans proper.
- 1711 VIO ile relegated to present-day site on bay Move marks troubled era in early ouisians mixtory, with failed settlement, disease, and death matched by R. I. and interest on part of French government.
- Disinctioned with Louisiana and precocupied with other matters. Trench crown cedes coemy as commercial nonopoly to financier Antoin Crozat. Effort strives to discover gold and silver mines, raise tobacco on plantauons, and traile with Spain. All three aims fau; Crozat retroced and ouisiana to crown in 171/.
- King I ou s XIV dies; five-year old great-grandson Louis XV seends to Crone.

  Phasp phase d'Orléans acre as regent of France
- Ying issues edict regulating land grants and stablishing arpent ystem in Louisiana (one arpent quals approximately 192 English leet), whereby rivering land is surveyed in a long, narrow lot perpendicular to water vay. French long lots" later infinite ice formation on the Orlean. I diating street network, and demarcate nuch of southeastern Louisiana linuscape to it is day.
- Crozat's failure to develop Louisiana comme reially opens opportunity for Scottish mar end k financier John I aw to propose elaborate land-development scheme. Be friending Philippe due d'Orléens, Law acquires monopoly charter for compercial enterprise in Louisiana, reablishe. Company of the West, and launches brazen marketine campaign across Europe to lure settle hand investors. Law's involvement overses be opean proceptions of Louisian as a burdensome New World backwater; solony is now the talk of Europe.
- Septembe (1717 Directive to 10, nd Ne Crleans as red in Company of the West Resolved to e to lish, thirty league up the river, a burg much should be called Nouvelle Orleans, where land in a could be possible to an either the river or Lake Pontchartrain." Name of sectlement honors Law royal patron, Philippe, duc d'Orléans.
- In late March and early April, Bic ville's men clear cane of ke for foundation of New Orleans. Bienvilla's site exploits Bayou St. John Payou Road portage between Lake Pontchardain and Mississippi River, shown to him by Indians nearly two decades of ier. Located on elevated natural levee and angled to confront approaching ships, site—present-day levich Quarter—is highly problematic but specior to most in deltaic plan.
- 1718-1722 Bienville sing of New Orleans is called into question by rival colonists,

who debate relocating settlement to Bayou Manchac site (south of present-day Baton Rough) of ther suggested sites for company headquarters include Natchez, English Turn, Lake Pontchartrain shore, Natchitoches, Biloxi, Mobile, and Pensacola.

- Spring floods low woll on New Orleans. Headquarters of Louisiana color valocated ron Moods back to Biloxi area; Pienville, an advocate of New Cleans remaining at its present site, reluc an ly returns to Biloxi to build new fort.
- First large group of Africans arrives in chains, commencing fourte an decades of story ery in Landisiana. Over 5000 people, mostly from West African Senegambia region, are imported during 1719-31, first of two major waves directly in mafrica. Racial subjugation through slavery, could be diin 17. The Code Noir, profoundly influences New (1) ans' social and urban geography. Compared to Angue America, racial identities and relations. This became more complex and alurging in Caribbean-influenced French Louisiana.
- 1.19-1721 Law's Company recalits thousands of Fanch citizens (many from society, bottom rung), as well as German and Swiss farn erg to set (Caouisiana, representing first many rewave of Europeans to region. New O leans by 1720 hoasts houses for (overnor and director, company) fore, hostical, over 100 employees, and 250 concession-holders ready to york their land. But settlement is haphazerdly laid out; discent takes its toll; and commercial effort struggles firance by.
- "Mississipri Lubble" bursts; 10 n Law's highly speculative developm 1 scheme for Louisiana fails.
- 1720s Germans settle *Côte des Allemands* up 1ver from Tow Orleans and help fied struggling New Orleans with their agricultural productivity. Teutonic population in attenuation of french speaking with Creole society, lut retains source German ethnic identity for over a century.
- 1721 Ad ien de Pauger, ass. it int to Chief Enginee. Le Blond de La Tou, arrives to New Orleans and promptly a sep is La Tour's designs for new Buoxi capital to New Orleans site, creating tod y's French Quarter. Pauger's appressive plans cast New Orleans in a positive light. It imitive outpost grows into bona fide town.
- New Orleans population 519 (326 whites, 171 black a ves, twenty-one Indian slaves, one free 31 ck).
- On December 2. Company of the Indies official, ' ansfers headquarters of Louisiana colon, from Biloxi to New Orleans,' osung New Orleans' chances of surviving and prospering at its present local. n.

- 1722 Prost substitute all artinizian levees erected. Stanfed by La Tour and Pauger, le econy 1727 in casure eigen een feet wide, this eleet high, and one mile long, epresenting initial at repts to control Mississippi. Anthropogenic river control ultinizely successful in preventing annual floods but inadvertently stances deltaic print of crainal sediments and flesh water, helping cause catas ropaic land loss by late transieth century.
- 1/23-1/27 Caputair, Jesuit, and Ursun of religious orders at it e to cit, playing maior role is instilling Catholician. French culture, e function, one for orphous and in and, and other civilizing aspects to frontie, outpost Undine Kons are particularly influential in the ducation of girls and other cuvities, remaining action a city's spiritual culture to this day.
- 17.26 They Orleans population 901 (793 white, seventy-e gh) black s a es, thirty Indian slaves)
- 1727 New Orleans population 938 (729 which plus 65 et listed men, 127 black slaves, 17 Indian slaves)
- Natchez Indian aprising at Fort Posalie kills 200 colonists, sending shock waves through egion. New Orlean responds by control ting primitive rampart and most around street on bortification remains in altered forms until early An erron years, affecting unban de relia men of adjacent areas. Angles of old fort line remain visible coday in terrain parcils and building shapes between the tracks Street and displanade a venue.
- Company of the Indie; rel'r.quis' es a puisiana 'n king; era of private development ends after nearly twenty years of consistent under-performing. France 'ne nee views Louisian' population around 7,000, as a disappointment at best and burdensome failure at workt, unwerfly of renewed commitment.
- New Orleans population 1.22+ (1,02), whites, 254 black saves, nine Indian slaves, eight free blacks).
- Hospital founded. "Charity Hospital" later relocates for times to sites along backswamp edge, reflecting tendency to locate objectionable and threatening phenomena to "back-critown." Final site (1833) mails location of present-day Charity structure and explains origin of toda, "Charity's" history and leave structure's future in question.

New Orleans popu a. on 1,748 (759 whites, 963 blacks, and sixteen Indians). City becomes moonly-black in 1730s and remains so until 1830s.

- Ursuline Convent designed and built (1749-53) on present-day 1100 block of Chartres Statet. Edifice, no longer a convent but still operated by Catholic Arcadioces and state a sole surviving complete structure from French Calonial et a clidest descumented extant building in Mississippi Valley and a click plain, and outstanding example of French colonial institutional architecture.
- Ci va 1750 Claude Joseph Villars Dubreuil Cavates canal to power sawr II. minediater 1 elow cig. Waterway eventuan, establishes trajectory of Engia. Fields Avenue (1805) and Pontchartra v Lailroad (1831), which influences layout or a mercus street grids and not borhoods between 1 yer and the over next 200 year.
- 1754 1/63 French and Indian War (Seven Years' War ir, Furope) m. France against Englan lover claims in Ohic Valley; conflict draw in variou. European states and spreads around work. Defeat of France and disally realigns colonial world: I reach North America, including Louisiana east of Mississipp, it ceded to England. Areas west of river, including New Orleans (thought to be an island, in account of Bay un Manchae distributary and label), avoid English possession, having been secretly ceded by King Louis Xv. In the Trunty of Fontainebleau to his Spanish, cousin King Carles and In 1762. City gains an welcome new neighbor to not the British West Florida—to a lach many langlo settlers migrate over nixtly wenty years.
- 1755-1785 British exile French settlers from Acad. (present day Nova Scotia). Thousands of displaced Acadians eventually inid their may to Louisiana during 1764-95, drawn by French culture and or ographical accessibility. Mess Acadians scale west of New Orleans, for an gagricultural and natural-resource-based ural society separtie from or important to, urban New Orleans. Correct to docal pronunciation of Acadian produces term Cajun.
- 1762 1762 Dominion of New Orleans passes from France to Spain in taces: secretly in 1762, publicly in 1764, point ally in 1766, and militarily in 1769. Population remains largely Francop be no in Culture.
- New Orleans population 2.524 (1.05) whites, 826 black slaves, thirty-three Indian slaves, nineteen (rec blacks)
- 1775-1783 American Revolution fought mostly along East ru Seaboard; Spanish in Louisiana seize British outposts in lower Mississiry i and Gulf Coast region, with no immedia consequence to New Orleans. But war's outcome adds major new player to political geography and res iny of North America—and New Orlean

1776-1781 Six hurricanes strate New Orleans area and cause extensive damage. One, in 1779, was experienced by William Dunbar, who later reported his meteorological observations in *Transactions of the American Philosophical Society*—among first to document cyclonic nature of tropical storms.

- 1777-1778 Cpanish onsus et a merates 2,809 residents in New Orleans proper in 1777, and 3,059 in 1776, a six-fold increase nince first French census in 1721. The 1,552 whites, 240 free people of miled race, 105 free blacks, 213 miled race slaves, and 94.11 lack slaves live throughout sixty-eight "isles," on blocks, comprising nearly the entire city proper.
- 17.77-1783 Crunish government recruits rest lents of Granada, Malaga, and particultry the Conary Islands to settle in Louisiana, aiming to populate the colony's militia for possible war with English, augment at icultural production, and renear Louisiana more call rally Spanish. Over 2,500 Conary Islanders ("Islero") settle in present lay eastern St. Bernald Parish outers see la west of New Orleans, from Mauripas area to New Iberia. Island committing remained St. Bernard Parish today, where surnal less such as Rodrigus. Nunez, Torres, and Hernandez abound.
- City's first food mark. a small pavilion for Lutchers, opens; late. evolves into French Market (1791) and becomes the of New O. leans' most famous features.
- 17 863 Second major war e of slave importations arrives a irectly rola Africa, the first occurring in 1770s.
- 1780s-1790s With ottlers trickling into Onio and Wississippi valleys, river traffic begins to flow outhward toward Spanish Laws and I in ative frontier vess to of late 1700s develop, by early 1000s, into steady streem of flatboats (for downstriver traver) and keelboats (for returning appriver), whivering commodate and merchandise in and out winterior. New Orlean begins to benefit from nascent agricultural production in it dis ant hir tenand.
- 1788 Population of New Cleans 5,528 (about 50 percent white, 75 ercent enlayed black, and the remaind garee prograe of color). Population of colony is over 25,000.
- Good Friday fire destroy: 856 buildings in New Orleans, levelling 80 percent of city's structures and leaving about 70 percent of population homeless. Most original French color in structures are lost. One of last the amples of old French Creole house type, "Madame John's Legacy," is built an Dumaine Street immediately after confagration.
- 1788 New Orleans' in 't suburb, Faubourg Ste. Mary, now Central Business District) is surveyed upon former Gravier plantation above can proper, in response to population pressure and ruins of recent

fire. Old plantation be indaries influence layout of emerging street network, as would transpire in many other areas.

- St. Louis Cemetery is laid out behind city, reflecting tendency to locate objectionable land uses to back-of-town. New cemetery embodies Spanish traditional above round a combinent; replaces and French subterranean buril bound or the rgund, and St. Peter. Still in operation today, "St. Louis No. 1 asting page of many great local historic (If) gures.
- Free ch Market ... tounded along low city riverfront. Municipal market, originating from 1784 decision by Cranish Cabildo to centralize ... tan food ven loss, displays city's multicultural face to amazed visitors throughout 1800s. Vencino opportunities he plaunch generations of poor immigrants to marcial independence, including Sicilians in early 1900s, who settle nearby. Market is also birthplace of An arican tropical-fruit industry there is today is major as the interior in tourist lands are and economy.
- 1793 1795 Fli Vhitney invents counn gin (1793); Jean Ltienne de Boré successfully granulates Louisiana sugir (1795, near present-day Andubon Zho). These that hological breakthroughs help launch Countern cott in and signir plantation economy, replacing old colonial-era copps such as tobacta and indigo. Poth commodities en ich New Orleas sint a mid-twontieth century; also entrench slavery in region and play major roles in economic ar coultural geography of city and South.
- Second majo. Fre in six years—ar a second on ster ir four months, following late-summer narricane—destroy additional 212 structures in New Orlean. New Sparish building codes enacted affect blaze proce out traditional "first-generation." Creole building styles. Structure built afterwards reflect Spanish colonial traits, often with local embellable nents ("second-generation" Creole architecture). Village-like appearance of French New Orleans gives way to solid, alled, brick-and-state of spanish citystage.
- Covernor Carondel et an ects excavation of call from rear of city. Bayou St. John "Carondelet Canal" supplants Bryou Road as route to l'avou St. John and Lake Pontchartrain; now supplants and be delivered efficiently by water from coast and lake directly to rear of city. Canal, which a so serves as early drainage system, provide convenient in ht-of-way into downtown, used by railroads into twentieth analysis.
- Spain and U.S. sign 'I.C.' y of San Lorenzo, granting Arr cricans open navigation of Mississippi I': e: and right of deposit at New () leans for three years.
- **1791-1804** Slave revolt 'r Saint-Domingue (present-day raditi) threatens and eventually overthrows French regime.

First significant yellow fever outbreak strikes New Orleans. Spread by *Aedes aegypti* mosquite (b. Jbably introduced from Africa through slave trade), yellow fever kills over 100,000 Louisianians and nearly 40,000 New Orleanians over next century. Plagues deeply influence economics, human geography, se is a fall might on patterns, public image, and everyday life of city throughout the electron.

- Apprehen ive about United States' increasing interest in Louisiana, Spain, an empire in decline, whether retrocedes I ou siana to militarily powerful Trance.

  Word of transfer soon reaches U.S.; alarms President Jefferson, who views New Orleans as critical to western expansion.
- Napoleon sinc 3 20,000 troops to control situation in Saint-Domingue. Yellow never decime tes troops; slave reach intensifies and the stually apples French regime, reating Latin Americal first independent country (Haiti). Los of extreme, valuable sugar calony diminishes Napoleon's intensit in France's curpoersome and problem and Louisiana colony
- Spain rescinds American right of deposit at New Orrans (pernatted since 1797), exacerbating tension between U.S. no colonia powers. In a ident Jefferson launches effor to purchase New Orlans; threat of war charges, with Ingland casting eyes on Louisiana prize a well. Once perceive tas a beleaguered backwater destined for failure, New Orleans is now expeted by three nations.
- Wary of over extending its colonial empire, in need of money, and in light of impending war. Napoleon decides to sell of only Island Orleans but entire Louisiana colony to U.S.; treaty signed April 30. Formal hand-over of Louisiana, from Spain to France and thence from Pance to United States, occurs in Cabilds on December 20, classing colonial era. New Orleans, now in the gressive American hands, is forced ento by the neone of lichest and most important cities in nation, hemisphase and world.
- 1803 New Orleans population 8,056 (3,948 which, 2,773 slaves, and 2,335 free cople of color) residing in remaily 1 or 0 dwellings. Another 2,000 people live nearby.
- 1803-1840 New American city of New Orleanse own dramatically in population while also rising steadily in rank plative to ther American cities' populations (see graph, "Tracking New Orleans' Ascent and Decline, 1790-2007").
- Early 1800s Shifting river c' an el deposits sediment immed a lely above New Orleans, forming "battere" along Faubourg Ste. Marie a verfront. Geological formation instigates and controversy regarding public versus private ownership of valuable new referside land, reflecting differing Creole and American legal philosophics. Complex court case involves a resident Jefferson and lasts

for decades; area is expitually incorporated into urban grid; includes today's Warehouse District. Laws regarding batture ownership remain complex and convoluted to his cay.

- 1804-1825 Three atten buts to improve public health through sanitation and nuisance-abatement regulatory beards arise and failed up to minimal government support and commercial apposition to quaractines. New Orleans becomes recursive filterest, least an althy, and most least heappone major city for much of nineteenth century a fact oftentimes d'ented or covered up by city's commercial a terests.
- Ne. Orleans it incorporated as a municipal entity, legally establishing city government in ission, duties, privileges, and boundaries. Charter ends colonial erange in the standard makes New Orleans "Collaboration of Carlos of American Action is underway.
- Lower plantation of Berna 1 Marigny is subdivided for unbacked enhant. Fat boung Marigny become city's first expansion on natural levee in a downwiver direction. Neighbound, known as the "poor Indied" [mundipality or (1st let], becomes home to mostly working class Crede and immagaint population during ninetee. The century.
- 1806-1°10 Upper plantations of Delord-Sarpy ("uplantier), Saule (Colet), Robin, and Livaudais at subdivided for urbur development. Faulturgs Duplantier, Solet, La Course, and L'Annunciation expand lev Orlean unito wide natural levee in upper direction; area is a veloped with working class housing near river and granter homes inland. Neighborhood (today's Lower Garden District) becomes home to mostly American, and improgrant population during nineteen. Lentury.
- Act of Congress clarifies covnership of disputed lands in new American city; influences development of commons between the old city and Faubourg Ste. Maio. Act also reserves analyright-of way planned to connect Carandelet Canal with river, paralelece by sixty-foot-wide public highways. Canal is never built; corridor instead becomes 171-feo-wide "Canal Street. Additionally, act confirms most land titles of settlers from colonial times, preserving old French arpent land-division whem.
- Over 9,000 Saint-Doming 'e (Hai ia.) refugees arrive ... New Orleans via Cuba. Refugees, rough v. venly divided among white, tree people of color, and enslaved black, actible city's population and revive city's Francophone culture. They integrate into Creole neighborhoods and society, adding new layers of ethnic complexity.
- 1809 Faubourg Pontcha, train planned at headwate seef Bayou St. John. Area promises to developers into attractive faubourg, but developers stay away until late

- 1800s, after settlement of complex Myrna Clark Gaines lawsuit, one of longest in U.S. history.
- New Orleans population reaches 17,224 (6,316 whites; 5,961 black slaves; an 14.950 free people of color), seventh largest among American cities.
- Plantation of Claude Gemé is subdivided for urban development. "Fourbourg Train's spreads New Orleans toward backswamp, exploiting Esplanade Ridge, Dayou Road a pland. Neighborhood, known for its black Creol and immigrant population, is described toward as America's oldest black naighborhood but was accurally quite mixed.
- Louisiana a in tted to Union as e gu eenth state.
- 800s-1860) Despite institutionalized scial and economic oppression, ensloyed black population is residentially integrated with whites in "dessic Southean" urban activement pattern of enclaved living in about adjace the those of their master. Free people of coor reside mostly in 1 wer city; mancipat del lacks live mostly in poor back of town.
- 13.12 Lirs Mississippi Riv a steamboat docks at New O. leans, having departed Pittsburgh in late 18.12, evading the Grot ralls of the Ohio, who essing the Great Comet of 18.11 and encountering recent demonstration of the New Madrid earthquake in Missouri. Successful demonstration of the nerging steam technology promises efficient uprive of ound the sportation, replacing slow-moving keethoods for travel against current "Stamboat era" begins in ear nest by early 19.20s, after technological, logis it all, and legal barriers (namely monopoly granted to owners to bert Fulton and Pabert Livingston) are sumounted to ith city in American hands at the interland under intensive of ton, sugar, and grain cultivation, new steam on t transportation puts New Orleans in strates in position to become principal Souther 1 sity.
- On Jonuary 8, local mil. in under nor mand of waj. Gen. Andrew Jockson defents advancing British unops at Chalmette. Lutle of New Orland terminates Luglish threat to young nation brings on is society to national affention, and helps integrate isolated, once-region out ast into national for. Anglo-American emigration increases, as does foreign immigration.
- Crevasse at Macarty's Plan. Ition in present-day Carrollt a floods backswamp to rear streets of city. Vater damages city infrastructure and crops, but coats land with layer of securion, building up elevation and helping enable early development of Carra ion. Flood actually saves lives by cleaning city and reducing death rat by ver half.
- **1810s-1870s** City expands steadily, mostly in uprive or irection, on relatively broad natural leve in present-day uptown. Expansion occurs through piecemeal

subdivision of old long lot sugar plantations, and through political annexation of Lafayette (1952), Jefferson (1870), and Carrollton (1874). Plantations subdivided into up own faubourgs during nineteenth century include Faubourg Nuns (des Religieuses), Panis Plantation (Faubourg Lafayette), Faubourg Schwarz, Livau 1953, Delassize, Plaisance, Delachaise, St. Joseph, Bouligny, Avarz, Lerville murstville, Boomingdale, Burnoville, Foucher Tract (Audubon Park and Grizersit, Campuses), Greenville middle plantation (Carrollon).

- Lato 1010s I response o War of 1812, U.S. War Department begins building "Third Sys en" forts it ing Atlantic and Gilli coasts, including key water way in and near New Orloans. Military later a quires riverfront land for barracks and naval bares, recogning strategic location and vulnerability of city, which becomes one of nations most fortified. Military presence increases with the interfer world wars; remains big a cill employer today.
- New Orieans population reaches 27,176 by some account, +1,351 by 6 thers (15,24) whites; 14,946 bit is slaves; and 7,188 free people of color). Inclusion of adjacent areas may account for difference.
- Tarly 1' 00s Travelers from L. "ope and eastern seal and visit New Or L. as and marel at booming por 's social and physic discinctiveness, particularly its ethnic diversity. National perceptions about New Orleans, a unical and exotic city, or alternately as a ricked "Sodom and comorrab, begin to term.
- According to The New-Orleans Die tory and Anguster city and suburbs cour "1,436 brick, and 4,401 wooder awelling; 1,258 brick and 1,567 wooder warehouses workshops, &c., 28 Lick and 15 wooder public buildings, making in the mole 8,705 buildings of every description. New buildings are daily rising particularly in the upper part of New Orleans."
- 1824-1828 " St Jewish congrega to r s four dearn New Cleans, notably Congregation Slangari Chassed (Gata of Merch) in 1828, predecessor of Touro Synagogue.

  Inter-arriving Gernar plays form small enclave at foot of Jacks at Avenue, which would migrate to uptow Conive solverea by turn of twe stight century.

  This older, established Reform Lawish population lived separately from Eastern European Orthodox Jense who softled near Dryades Street in late nine-teenth century.
- 1823-1836 First true municipa witer system, designed by Benjamin H. B. Latrobe, replaces various makes! if efforts. Located at foot of Drealines Street, system uses steam pump to his wriver water into three-story pamphouse, where it is stored in raised horse, foirs and distributed to residential households through network of cypes spipes.
- 1825 Erie Canal is protate New York connects Great Lakes with Hudson River. Wa-

terway gives New Yo. City access to western frontier, suddenly challenging New Orleans' monopoly on Mississippi Valley trade. Conservative New Orleans business om nunity fails to diversify economy during ensuing decades, focusing instead on booming river trade. Seed for New Orleans' decline is placed, but it inited amid antebellum prosperity. Erie Canal spawns rampar traderway excavation of each here: more bad access for New Orleans.

- 1825-1850 Louis. He and Por land Canal complete I to circumvent waterfalls in Youisville, Kentucky, Substacle to Ohio River navigation. Canal benefits New
  Orle has by providing fast, uninterrupted shipping to Pittsburgh, eve. has Erie
  Caran draws to affic away from New One ans.

It's constructed as U.s. military post in lowermost correct of Orious Parish (2) mplex of outstarding Greek Revival structures verifing turn ted walls follows landmark for visitous sailing upriver; serves as jumping-off point for troops in Mexican Warma other operations. Renamed lackson Barrasks in 1866 installation is now come to Louisiana National Tuz d.
- 136 And o displeative with Creole political control and care rethnic tonsions lead a creation of essentially three set arate cities within New Orleand lower rant and Third municipalities are morely Creole and im magnant: up to Second Municipality is mostly Anglo and immigrant. "Muricipality system" is in officient and divisive, but influentiating ethnic geography of city, producing perception of Canal Street as dividing line between Creole and American cultures. City in the first in 1852.
- 1836-1833 Municipal market, system begins s each expansion. Public markets open bove (Poydras Market, St. Mary's Market) and below (Washington Market) old city, while of ginal French Market, established by Span. In administration, enjoys its own expansion. New Ordeans municipal mark to by grows steadily to thirty-four must in 1911, becoming larges a consystem in nation.
- Panic of 1827 and ensuing depression interrupts city's economic bustle; many wealthy (it) ens lose fortunes
- Stron Gurricane hits New Oleans, danliging st. stures and flooding murshes adjacent to Lake Pontchardin.
- 1837-184 2 pulent "exchange needs," be "it in First and Second municipalities, combre pelodging, dining har king, and conference space under one points. Louis exchange Hotel opens in predominantly formule First Municipality, domed St. Charles Exchange Hotel opens in predominantly Anglo Second Municipality. Each becomes nuclei for conference on Pole-Anglo interests, and are described as among most splendid hoters in America. Both cater to extended-stay guests during wintertime business season.
- **1830s-1840s** New American aeschetics affect built environment: Creole architecture peaks and begins to decline in French Quarter; replaced by Greek Revival, which first arrived here in 1808 from Northeast. Swistic shift reflects larger cultural changes a politics and society, from C. Ole to American.
- **1840** New Orlean py pulation reaches 102,193 (59,519 whites; 23,448 black slaves;

- and 19,226 free people of color). City is third-largest in nation, the highest ranking it would even achieve.
- New Orleans is rated ... as the fourth port in point of commerce in the world, exceeded only by London, Liverpool, and New York."
- and in the normal serious of the serious states of the serious of
- 1340s De trehan Canol dug to connect Mississippi River val. Bayou be rataria and Darataria Dev. Canal helps devoto. West Bank; is expended as "Thereey Care." with modern locks in 1907 and videned as part of Gelf Intracta tal Waterway in 1924.
- 1 (40s-1910s New Orleans continues is to grow in population, by declines in runk relation to other American cities. Increasing rational and small competition for Mississippi Valley trade partially explains why New Orleans begins to fall behind other cities (see graphs, "New Orleans' Noteoric Runs, and Relative Decline, 1810-1060" and "Tracking New Orleans' Ascent and Decline, 1790-2007").
- War with Maximum breaks out following U.S. and vatical of Texas. New Orle ans plays prominent role as jumping off point for troops and munitions; local Picayune near spaper becomes a gior source of war reporting for nation. It volvements ymbolizes era (particularly 1.30 s 50s) when New Orleans source as favored site for launching campaigns or idventu. Sm and intrigue into a tin America
- 1840s-1850s Main era of German. Anmigration to New Orleans. Like Irish, Germans set is in dispersed program throughout city periphery, particularly in Lafayette in Third Municipan. It Somewant better educated than Irish or burdened by language barrier, Germans in till right cultural and institutional traditions into New Orleans society.
- 1840s-1850s Retailers migrate from narrow Roy I and Chartres streets to commodious Canal Street, until now a most residential thorough fare. Canal Street becomes South's precide downtown shopping destination until 1960s.
- Mid-1840s After seven failed at empts since Louisiana Purcha., New Orleans launches a professional, staffed Board of Health to und reland and improve city's terrible publicated lith crisis. Hard data and he as stassessments of deplorable conditions are finally documented, yet death reconcerns in ensuing decade, in part because of official complacency.

Illinois and Michigan (I & M) Canal is completed across hundred-mile-long "Chicago Port ge," providing waterborne passage between Great Lakes and Gulf of Mexico watersheds. New western commerce opportunity fuels develop in a tof Chicago, while diminishing New Orleans' once-monopolistic cor 'Chicago Sariyan, and Ship Canal.

- Crevasse in levee Sauvé Plantation in Jefferson Parish diverts river water into Sowlands Letween natural levee of Mississippi and Metairie/Sentilly ridges Water (17) backswamp and numdates city from rear, to within blocks of riverfront chomerges 220 block, damages 2,000 structures, and displaces 12 000 residents. City infrastructure is rebuilt with funds from special tax. "Sauvé's Crevasse" ranks as New Yrleans' worst flood child Hurricane Kanina levee faitures of 2005.
- 18/--- St. Louis Cathed and twin Pontalba Luilding sconstructed, Cabildo and Presbytère renovated with Mansard roof, and curous; Andrew Jackson such is installed; newly indeed and landscaped plaza reasoned Jackson Sutstanding work transforms dusty commons into place of oundor, completely intact today. Cast-iron galleries are Pontalba Luilding instigate local fashion craze and forever change streetscape of grench Quarter, as iron-lace galleries are added to numerous toward uses and torehouse.
- 1847-1858 Yellow fever outbreak in 1847 (2) ms lives of over 2,300 New Orleanians; commence era of terribly costly epidemics. Illing at least 22,500 in upcoming twelve year. disrupting nearly corry aspects flife in New Orleans. High death tolls are a product of poor monicipal an itation, perfect habitat for invosive Aedes as ypti mosquito, and large numbers of variorable residents, prin arily Irisland German immigrants.
- 1850 New Orleans population reaches 11°,460 (\$1,431 whites; 18,068 o ack slaves; 14,419,961 free peor 1 cr color) Despite growing population and booming economy, city drops in rank from third argust in nation in 1840 a fifth-largest in 1850.
- 1850 New telegraph lines speed city's communication links with adjacent cities and points downriver.
- 3,700 miles of canal are completed in U.S. since Erie Canal opened in 1825. Waterway excavation in North further threatens city's onip on Mississippi and Ohio Valley trade but busy traffic on river obscures growing threat on horizon; New Orleans merchants focus on short-term proportunities and prosper during antebellum 'golden age."

New railroads in No. heast give East Coast cities additional access to transAppalachian region, even when canals freeze in winter. Railroads further
weaken New C 'lea's' command of Mississippi Valley trade; there are now numerous ways to get resources and cargo in and out of North American interior.
The portation costs decline for Western commodities in Eastern urban may
lateral city dweners that it end less on food and more on manufactured goods,
tueling incontribution in North. Completent business leaders in New Or e
ons are lateral bring agrailroads and inductive to city, viewing traditional or er
transportation as savation.

- As a cry becomes most divisive is use in nation, racial tensions in reast elocally and rights of nee people of coloure curtailed. City's traditional caribbean-in fuenced the e-tier racial caste system begins to give may to two tier (white/black) notion favored in rest of notion. Some free Creates of colouresport by leparting for Mexico, further to minishing city's remaining the population in rate antebally no years.
- 52,011 immigrants arrived New Orleans, almost equal to number crived to Diston, Philadelphia, and Baltimore combined City is primary immigration to in South and second in nation (behind New York) for most years become 1837 and 1860
- Municipality system (1836) is abandoned; Lafa et a incorporated into New Orleans. City emerges from municipality era with new Apole-American ethnic domination and momentum toward uprice expansion. City's political and econon ic epicenter, including City Hall, is relicated from old city to Faubourg of Mary. Old hous mumbering system and ward boundaries are updated
- 1850s Local rublishing industry bifts its bare from Chartres Street in old by to Camp Creet in Faubourg St. Mary, reducting increasing influence of American side of town. "Newspap of low" reduction in and around 300 block of Camp Siries until 1920s.
- 1850: Otton District" forms around Gravier, Carondelet intersection. Cotton factors and merchants form busy for ancial Gravier in heart of Factoring St. Mary, nerve center of Southern co to Leconomy. District survives in 1950s.
- City's worst yellow fever epidemic cuaims at least 8,000 in es, probably closer to 12,000 (one-tenth tile lity); Irish and German immigrants suffer disproportionately. City streeth are nearly deserted during summertime months. While local pressing in one of a rously underreports stories of all igue to avoid affecting commercial interests, newspapers in rival Northern ports, particularly New York, document lew Orleans' yellow fever minents enthusiastically. Subsequent epidemics in 1854-55 continue suffering or city's underclass.

1855-1858 Three promine at ational churches arise in former city of Lafayette, now Fourth District of the Worleans. Predominantly Irish St. Alphonsus Church (1855-58), Ge mar language St. Mary's Assumption (1858-60), and Francophone Notre Dame de Bon Secours (1858) are erected in close proximity, sy replizing the litethnic nature of uptown New Orleans in late antebellur at Similar situation preparation of these geographically proximate. Furth parables are merged around turn of twenty-first century, fue to "Limed rescurses."

- Hut, 'ane strik's coastal Louisiana, soaking New Orleans and destro, ing uttern, hotel resert on Isle Dernière (Last Island"). Death toll of over 200 includes many prominent New O. Lanians.
- or Mard Gras from private lally and disorganized screet maybem to public parades a notiful royalty, an laborate civic ritual. Mardi Grac, celebrated in Louisiana since 1699, soon develops into premier outward cultural mart distinguishing New Orlean. Com other American cities.
- 18.58 In cher 4,800 New Orleanians perish to venow fe er, city's econd-worst plague. "Yellow jack' Coath toll declines nearly to zero during Cook War years, the in large part to sai itation efforts under federal occupation."
- New Orleans p pulation reaches 174 491 (142 063 wh. as; 14,484 black slaves; 10,939 (re) people of color). Despite g oving population, New Orleans' rank amoug American cities in clines, from third largest in 1840 to fifth largest in 1850, to sixth-largest in 1800. Last antebellum year also marks city on highest ratio of whites to blacker nearly six anone. By 2000, blacks outnumber whites by more than two-to-ores.
- Thirt, it e-thousand mile of railroad rack cris (1) ss U.S.; railroad a. d. anal contraction continues to 1) time New Orleans command of river rade.
- The hurricanes but to coastal Louisiana within two months, cuts ng widerote ad damage and cut loss.
- 186 Is Barges replace flatboats on the riverfront. Old flatboat landing is replaced by new docking facilities for powered barges; picturesque Mossi sippi flatboats from frontier era disappeor from waterfront, except for coal transport. "Probably we will never again so the old they so flatboats revive."
- Louisiana secedes from Union. Local Gen. P. G. T. 3. uregard fires opening shots at Fort Sumter: Civil War begins.
- New Orleans, workly defended by Confedera , succumbs peacefully to federal troops executing "Anaconda Plan" to encirc' South by seizing Mississippi River. War end's early for New Orleans as federal troops occupy city; South

loses premier metrop lis and critical grip on lower river. Region's slave-based plantation economy, which enriched white New Orleanians since colonial times, collapse for ver; era of human slavery in New Orleans draws to a close after 143 years.

- 1862-1865 Couth and Southern agriculture devastated; shipping commerce to New Seleans in terrupted, foreral presence and post-war racial tensions alter social landscape.
- 1860 1890. New social and urban factors affect built environment. Cottag s, often with slave quarter, and courtyards, liminish in popularity in French Quarter; replaced by she trun houses, which wak in popularity during turn of century eta. Individually crafted vernacular structures give way to quasi-mass-produce d "ca alog houses.
- 1864 1866 Small out prominent Gree<sup>1</sup> community found. first E carn Orthodox Church 1. Western Hemist are. Holy Trinity Claren become religious center for Creek New Orleania. for century to come Sixth Wa. d neight shood around church's 1222 No † 1 Dorgenois site 12 comes got graphical nucleus of Greak community.

- Violent riot breaks out at Mechanics Last tute, in thich mention ex-Confederate white Demorrate and their allies engage black to dical Republicans and their supporters, assembled for Louis. A Constitutional Convention. Tragedy claims dozens of lives (mostly thick), injure, over 100, and presages heigh ened racial ension and violence in Reco. Struction are Louisiana.
- 1866-1867 We deity back under citation control and no longer subject to military enforced sanitation, public boatch troul longer eturn. Carolera strikes twice in 1866; yellow fever outbreak in a lower gyear claims over 3,000 lives.
- 1867-187. Sugar planters, the king replacements is remancipated slave. Import Chinese workers from Cuban plant tions. If the fails, but brings start number of Chinese to city, some of who eventually settle in Third Ward and form "Chinatown" around 1100 block of Tulane A. anue. Others start family-owned laundries dispersed widely the augmout city.
- 1868 Enterprise on Delacha. Street successfully manufactors and sells ice, one of first in nation. Year-round availability of ice allow corner grocers to carry perishables, previously limited by law (for health real lns) to city-controlled markets. Corner grocers, often run by Sicilian imm. Trans, appear throughout expanding residuatial areas. Parallel development of refrigerated shipping in this era enlarges meatpacking and other food not sustries from local to national scale, and expends list of commodities transhipped at New Orleans.

1868 New state constitution is among most progressive in nation, extending suffrage to blacks while calling for integrated public schools and accommodations. But entrenched racial order from antebellum times eventually trumps constitution's has, as racial tensions increase and federal troops depart in subsection decaue.

- state legis atture takes action against pullic health nuisance created by the livestock and mean recessing indust y. New law treats butchering as public us lity, creating monopoly and centralizing and isolating slaugh whouse action es awar from city population. Outraged independent butch results sughterhouse Case" arrives to U.S. Supreme Court, which decides in favor on state monopoly in 1873. Locally, court's decision consolidate stockyards and slaughtering to Orleans/St. 1. mard parish line in thousand the proceeding of the proceeding interpretation of Fourtes. The American entire contents are the American entire the stocky and slaughtering to Orleans and parish line in thousand the procedure of the American entire contents.
- 18/0s-1376 s Rauroads are built across eastern marshes connecting city with a golets, St. Tommany Parish, Microsppi Gulf Coast, Mobile, and points each Speedy new transportation option unites New Orle ris with coastal areas and diminishes passenger steam point traffic to Port Point hartrain on Elysian Fields Avenue lakefront. Recreation spots, summer chapes, fishing camp (a) dibedroom communities for each commuters develor along raint ad, practicularly in Bay St. Louis area.
- International a ditectural styles begin to mou, dize citys ape. Creole architecture disal be its almost entirely, as lo ante a lum American styles (particularly Greel Revival). Italianate facules, here since 1850s via English "Pictuesque" in overment, rise in popularity.
- 1870 New Coleans population resches 191,418 ninth largest in nation. Employed ed slaves migrate to city in cloves, doubling 1860 black population to 50,456 (26 percent of total 1870 opulation). Most settle in back-of-torin; demographic pattern remains to day, the gai back wanp is drained.
- Late 1.90. Settlement patterns enange since ant william years. Expande 1 streetcar networks allow affluent families who tradic nally lived in innersity, to move to new garden ("trolley") suburbs, once occupied by poor Iris 1 and German immigrants in antebellum times. Move opens up housing opportunities for poor in inner city, where job also exis. Throughout late 18 % and early 1900s, immigrants settle mostly in ring of inexpensive, convertently located working-class neighborhoods immediately surrounding CBD. The "immigrant belt."
- 1870s New Orleans an exe. Jefferson City, on uptown e. 6.1 ank, and Algiers, across from French Courter on West Bank, in 1870. Ca. ollton joins city in 1874. Wards and municipal districts are adjusted to incorporate new city land. By 1880s, modern snape of Orleans Parish emerges.

1870s Sugar planters store recruiting peasants out of Sicily to work on Louisiana plantations in place of emancipated slaves. Sicilians, long part of New Orleans' tropical fruit trade, come by thousands between 1870s and 1900s. Most settle in lower Γ το ch Quarter ("Little Palerme") and predominate in and nearly noth Market until a cond World War II.

- 1870s Livate company exervates drainage canal in lakeside marshes. Although project contually its, canals are latering reporated into successful memoral drain one effort of 1896-1915, and remain in service today as the 17 Street, Orleans, and London Avenue outfall canals. All three waterways consibuted to catastrophic mooding following Turricane Katrina in 2005.
- vinds provent lake's normal carre send viver water into Lake Ponte. A train; June winds provent lake's normal carre with the gulf, allowing water levels to rise in a f-joining was a Basin drainage and. On June 3, level breaches a Magan Avenue and mundates area between Old Basin and New Lusin cause up to compart Street Norst flood since Couve's Crevasse, the Ponnet Carre Crevate deluge in strates how man-made navigation canals the eaten population by bringing lake and gulf water in obsert of city.
- Metairie Cemetery is aid out on form or recetracke recomes must famous of numerous cemeteries on Metairie and Gentilly ruges. To complic features also host parks tall grounds, and other arge-scale public land uses which require well-draw a land and proximity to city population, but need too much acreage to be located in city proper.
- Violent rich between Democratic White Lague and Republican Metropolitan Polician foot of Canal Struct represents fashy only of post-war racial tensions. Conflict involves the sands and produces over 100 casualties. Conument to Battle of Liberty Page "late 11 dicated a site becomes controversial remain er of racial discort in modern times; of alisa is eventually relicated and case ed over with message of racial econcilation.
- 1870. 10. 3s Orthodox Jewish people mostly foon Poland and Russia set le between Dryades Street and St. Charles Denue. Le immigrants and their descendants form "Dryades Street neighborhood," New Orleans' only posul rly recognized Jewish neighborhood, dissinct from estaclished Reform Jewish community of uptown. Jewish-owned 1 ops on 2 w des, and residence and religious institutions riverside of Dryales, remain into 1960s-70s.
- Late 1800s Emancipation are constructed as the state of t

color" tradition rometicize city's history and Creole society; New Orleans mythology is born and survives to this day.

- 1875-1879 With sedimentation of river channel delaying shipping traffic at mouth of Micrissippi, C. pt. James Eads constructs parallel jetties at South Pass. Structure, construct water any, increase velocity mobilize sediment, and deep no channel, any ying occan-going vessels to enter river promptly. Coupled yard development of barder, growth of local rilly and network, and improving, conomic conditions, and development of barder, growth of local rilly and network, and improving, conomic conditions, and getties help city rebound from post-war slungs, but engaged error also diverts sediment away from Louisiana coast and onto edge of continental shelf, rather than puilding up marshes of bird oot lelta.
- Federal troops withdraw; New Or eans' turbulent occupation and Reconsultion at ends.
- Late '87 Os Garbage, waste, and excrement, traditionally numbed in '17 Mississippi at various 'nuisance wharves' along riverfront, are now loaded into barges and dumped in the middle of the rebelow city limits. Service is provided not by city but by private volunting Citizens' Auxiliany Sanitary Association (1879), which also installs river pumps and pipes a tush out into streets
- 1878 Vyorst yellow fever Justbreak since 1856's ca ims over 4,000 live
- T. S. Hardee and Auxiliary Sanitation Association publish top ographical and Drainage Map of New Orleans and Su. of ndings in ost accounted city map of era. 1879 version includes first comprehensive elevation reassurements of city, at one-foot contour interval.
- 1879 Federal government creates M. sussippi Tuver Comm. sion, ending era of local and state levee projects and commercing modern era of federal authority over flood and navigation control of M. ssippi Tiver.
- New or rleans population reaches 215090; 11 cx population 57,617 (27 percent). By one account on is ethnicat ix consprised "some 70,000 Trench and Choles, 30,000 German, 60,000 Negroes and mulattoes ... 10,000 Mexicans, Spanish and Italians [and] 80,000 or 50,000 ... Anglo-Americans," including Irish. City is now tenth-largest an nation, Cropping steadily from rank of third in 1840.
- Growing city boasts 566 males of a reats, of which only an ety-four miles are paved. Of those, cobble to hes cover 35 percent, pulve of a doyster shells overlay 25 percent, stone paying blocks cover 24 percent, and the remainder are treated with stone flagments or planks.
- Railroads now 'in' (New Orleans to Cairo, Illinois a. d points upriver, to Mobile and points north and east, to Morgan City and moints west, and to Donaldson-ville across 1 v. (via ferries). Network of tracks complements city's shipping

industry but pales in comparison to those connecting emerging Midwestern cities with northess are metropolises.

- Late 1800s-early 1900s Remarkable era of innovation, particularly in electrification, transportation, and communications, transforms cities and alters political and economic geographies. Progressive voices nationwide actively promote death of cities, in taking improved water, sewerage, and drainage systems, and cream of city parks and playgrounds. Transformations foster development of Central Busine. District as non-residential inner core of high-rice office buildings, equipped with telephones and elevators. Office workers relecate to gardie. ("trollow") suburbs and commute on electrified streetcals and, later, automobiles Grobally, era witnesses snift in geo-political and economic power from one assed on sea to one based on land. New Orleans, founded for its give./sea position and overly dependent on waterborn, transportation, is ill-prepared for modern era.
- La' 18:08 early 1900s "Local color" literary tradition tourished mency. Write it such as Conge Washington Calle, Kate Chopin, Charles Grarré, Grace Ying, and a feadio Hearn help mythologize New Orle ris in public mind, forming foundation of modern-day courism economy.
- Thinese Mission, four ded on South Liverty Street dows Chines, immigrants to Third Ward back-of-town; Chinatown torms around 110 block of Tulane Avenue and survives until 1937.
- Park. Exposition fails commerced by, but succeeds in resping develop servicural uptown into prosperous fredley substanding urban park and university campuses. Event also offere rational and international enue for Louisiana artists and writers, who gair prominence afterwards.
- 1885-early (\*Cos First local coo'u coks poblaned, documenting city's foo lways and horing form national communication of distinctive New Orleans cuising. Publications coincide with rise in tourism, fueled by World's Industrial and Cotton Catennial Exhibition in Audinbon Park rising leisure class, air oad travel, and "local color" literary genre. Now a rajor source of local identity, city's food heritage is pillar of modern tourism industry.
- Strong hurricane, worst since 1837, trikes New Orleans causes extensive structural damage, floods some areas with rainfall, and downs recently installed telephone and chatrical lines.
- 1890 New Orleans pop Jauon reaches 242,039, twelf L Jargest in nation. Black population is 64,4 > 1 (27 percent).
- **1890-1891** Murder of Police Chief David Hennessy Jamed on Sicilian mobsters; eleven Sicilian held at Parish Prison are lynched in retaliation. Incident leads

- to international cricus' etween Italy and U.S.; leaves deep scars in Sicilian community, contributing to its social isolation in "Little Palermo" (lower French Quarter) at tuny-of century.
- 1890s-1900: Arabi subdivision develops upon old Le Beau plantation immediately below New Cleans, hinging upper St. Bernard Parish area into urbanized
- 1890 1 20s Tymer Fou ther tract and Allard Plantation landscaped into Auc thon Parl and City Perl respectively.
- Audubon Plac and other exclusive residential streets represent early form of roo ing and "ga"ing" of communities.
- 1893 Extremely powerful hurricar e c evastates coastal soursiana and Gulf Coust, killing c v r 2,000.
- 189? 1895 City council empowers new Drainage Advisory Board to study and solve city's age-old drainage problem. Board colleges vast amount of scientific and engineering data, develops large-scale topographic men. Ind propies splan to drain water off natural evee to low point in central city, then pine it through canals into adjacent likes. Construction bigins in 196 and propresses substantially following 1899 bond issue.
- Tulane Univer its relocates uptown, after sixty rears down own as antecedent institutions. Conversity area" for this Loye a University noves next door in early 1900. Twin campuses in part vital character to uptown, helping form a fluent neighborhoods with high veducation, sidentian opulation, many from out-of-town.
- Erratic 1352 house-numbering system is replaced with logical system. In use tod 1,1 h which addressed in remaint by 100 per block, with odd numbers indicated a lakeside or downs, or side. From reflects Progressive Erras insibilities of improved municipals review
- 1897. 1900s Research conducted at Au dibon in Krefines methods for purifying river water for residential use. Shortly thereafter, purification and an tribution plant is constructed in Carrollton, iringing the into modern age of municipal water systems. Carrollton site provides to private riverside location and elevation to draw water from Mistir appi, remove sediment, add are and sulfate of iron for softening, purify it with chloride gas, and store in high-lift pumps then distribute water to the residents everywhere except and giers, which is served through similar was and system.
- 1890s-1900s Steel-frame construction and concrete pings are introduced to New Orleans; firs syntation of high-rises erected in CBD and upper French Quar-

ter transforms city's sivline.

- 1893-1898 Streetcar lives a e electrified throughout city.
- 1895 Conflagration destroys much of Algiers, last of great city fires. Algiers rebuilds in ear of late Actorian architecture, giving Adem-day Algiers Point neighborhood a quaint, turn a century ambiente.
- 1896-2015 Following two years of research and design (and financing in 1867) a world-class drainage system is installed to remove runoff and standing water in low lying backswamp. System radically alters geography of New Cleans: swom; and nawles disappear; urk an development begins to spead toward lake; middle class whites move of natural levee and into new lakefront suburbs (which explicitly exclude black through deed coverants). Cross ent-shaped in storic 1 key Orleans gives way to modern twentieth century and ropolic.
- St. Augus ine Catholic Charch parishioner Home. Plessy tests post-Aconstruction Jim Crow laws by sating in whites-or y train ca. 1892). Level case regarding his arrest back and in historic 1896 Supreme Court decimon: Plessy virguson establishes "separate but equal" Level precedent, entranching segregation in South for next half-century. Further facilities in New Orleans, from sucetcars to school and department stoles, re legally segregate 11 y race. Case is viewed as the concluding chapter of the Americania ation of New Orleans' Caribbean-influenced system of racial identity.
- Alderman Sidney Story sponsors ordinance to an prostruction throughout city, except it fitteen-block neighberhood beared French Quarter. Subsequent ordinance creates second zone rong nearby Gravier Street. Laws succeed in controlling prostitution, but inal vertendry create vibrant and conspicuous red-light districts, dubbed "Surryville" no "Black Coryville" respectively. Storyville of comes nationally notorious and helps and m New Orleans and ient reputation for debauche y while also incubating some of city's musical genium. Storyville closes in 1917 by order of U.S. Navy; forming "sporting houses" are demolished around 1940 for Iberville Helling Project.
- 189° 1902 Sicilian-born Vaccaro bro ne s and R assian-born Samuel Zemurray independently start importing I an nas from Central America (L. ough New Orleans. Vaccaros) firm grow, into Stand rd Fruit; Zemurray s Cuyamel Fruit later merges with United Fruit. Ba ia, a companies tight of city's grip on nation's tropical fruit industry, attained in antebellum times via shipping routes with Sicily. Companies of tablish close ties between city and Central American republics, particular of Ionduras, deeply influencing political and economic landscape of Central America for years to come. How urans immigrate to city in modest numbers throughout twentieth century, siving New Orleans one of largest transplanted Catracho populations. New currently reside in Kenner, Metairie, and plud-City.

Turn-of-century Jazz musical style emerges from myriad local and regional influences; soon diffuses ratio wide and worldwide with help from Tin Pan Alley music industry and nascent recording technologies. Jazz becomes "sound track" of Walturn world from 1920s to World War II and is commonly recognized a New Orleans most sign a cant cultural contribution.

- 1900 New Origins population reaches 287,1(4; )lack population 77,714 (27 percent). City remains + velfth-largest in ration
- Race not erupts collowing violent embange between police officers, and back-to-ferica advocate Robert Charles. Incident, which occurs in poor, solated back-of-town area settled by emine pated slaves, is often described as city's task majorials eriot, attesting a relatively peaceful race relation, here. But neighborhood, present-day Central City, remains thousand to a very
- Early 1-900s Ste. 1 powered riverbots are gradually regimed by the larges and other petrole im-powered vessels for freight shipping. Cights and lounds of teamboats crowding riverfront clisappear from Missispiping for excursion vessels, many of which carry local jazz bands to it tellor cities.
- 1901-1920s Dock Board modernizes port facilities constructing river ide warehouses, grain elevators, canals, and new docking space
- Louis Armstrong worn in back-of-te vr, as ja wera emenges. New Orleans' most famour som greatly enhances city's image in eyer of world, but city fail to embrace wristrong until years when his death, even der iolishing his neighborhood in 1950s for new City Man complex.
- 1904-1920 and 1,26 Algiers resident Mayor Martin Bearman oversees important civic in provements, including modern, lation of livainage, sewerage, and water systems; expansion of any service and public education; and creation of Public Belt Railroad.
- 1905 Ever 400 people d's'n ity's (and nation's) ast yellow fever e inemic. Poor Sicilian immigrants living in cauraed con allicions in lower French Quarter are blamed for outbreak. After Acoes aegyptical identified as vector, new drainage and potable-water systems (Liminating mosquito-breeding polidles and cisterns) finally end century old public bear h problem.
- 1905-1910 New home construction commences in recently plant a Lakeview subdivision, drained from marsh only a few years earlier. Lakeview develops mostly during 1910s-40s becoming comfortable and stable hiddle-class inner suburb. Deed covernents restrict home ownership to the best only, affecting city's racial geography, as middle-class white familie "leapfrog" over black back-oftown to settle in drained marshes.

1906 Continuing spirit of nunicipal improvements ongoing since 1890s, Olive Stallings establishes city's first playground for neighborhood children. Stallings leads new Playgrounds Commission in 1911 and eventually wills a portion of her estate to city's public playgrounds and pools, leading to birth of N N Orlean Correction Department.

- 1910 New Orle of population reaches 339,075; Mack population 89,262 (26 pt. cent). Ch. drops to n. eenth-largest in n tic n.
- Architectural stric change: Creole cooliges and shotgun houses docume in popularity, replaced by Craftsman, City Beautiful, and California and Euler bungalow. Three-lay townhouses give any to "catalog" framehouse, vilus, and other structural typologies and stale.
- 1910s: 1. 10s Ge and significant substitution of the substitution
- 1910s-19:3 New Orleans continues to grow in population, while stabiliting in rank remaine to other American cities at around the lifteenth largest city. In U.S. (see graph, "Tracking Now Orleans' Ascentant Decline 1790-20 (17).) Shipping and industrial activity relating to two would ware help, explain suspension of city's steady decline in national ranking
- City's thirty found municipal market opens but process to be last, as competition from a biquitous corner governs store takes to on old centralized stall market. Automobiles, supermarkets, hanchies, suburbanization, and globalized to od production and distribution endersystem obsolete by hid-twentieth century.
- 1912 St. Charles Hotel launches national is a keting sampaign billing New Orleans as "the City Care Forgot." Effort near instill shoan into national levicon.

- New Orleans Public Service Inc., gains anti-ol of all streetcar lines, electrical service and natural gas distribution in Ety. Dec. To of 1920s marks apex for street car system, with over 220 track wites spanning from West End to Lower Ninth Ward and on nearly every pto in river-parallel street between Dryades and Tchoupitoulas. A printing forty years see on idual transition to a bber-tire but es and termination of 90 percent of pileage.
- Association of Commerce Convention and Tourism Bureau Legins promoting New Orleans as "America". Most in teresting City," to cour teract languid, anti-business connotations or "City that Care Forgot."
- 1926-1934 Ambitious Lakefro. Project protects city from sterm-driven lake and gulf surges while creating high, scenic acreage for recidences, parks, facilities, and airport. Project as ically alters shape and topoor, phy of city; accelerates movement of population toward Lake Pontchartra.
- 1926-1935 With modern technology enabling road of astruction through swamps, new Airline will away antiquates historic River Road as main terrestrial con-

nection between Ne. Orleans and Baton Rouge. Highway soon draws old riverfront communicies away from Mississippi, but itself is superceded by I-10 forty years late

- Grant Mississa, voi River Flood inundates 26,000 square miles from Cairo to grult, kills have breaks, die places half-million, and threatens New Orleans. City a spared room river flooding, but control resial dynamiting of levee in placement and Plaquentines parishes to easure metropolis' safety creater basing ill-will betwee city dwellers and url neighbors. Nation's wors, natural disal or transforms federal river-control policy (through Flood Control Act of 1923) from "length one of massively augmented levees thoughout a federal river-control policy (through Flood Control devices the pughout a fessissippi Valley. Profoundly influential of puts federal government in flood control business, andating federal fine acial and engine ring esponsibility for controlling vississippi and other rivers, our immunitizing government ent from liability should these systems fau.
- 17203-1940. Old Basin (Caron Net) and New Basin canals rendered of plete by indirections, highways, and barges, are incrementally filled in, opening up valuations of ingress/egress condors to downtown. Former bad of New 18 sin Canal inter becomes Pontobar train Expression, 17th-of-w v.
- Late 2.028 Highway 11 Bridge erected over eastern Lake a nichar a in increases automobile access a Slidell and point se st. New bridges over Chef Menteur and Rigolets p. ses speed up trip to coastal Maxissippi
- St. Charles Avenue between Lee Circle and Jackson Avenue is zoned for light industrial use, leading to demolition of All nomes. Twenty-four years later, area is remarked to eight-story commercial of trick emouraging construction of large scale edifices. Zoning changes alter character of once-elegant learners. Charles to motley mix of readlers and to en lots a rid occasional old homes.
- 1930 N. Orleans populatio. reaches 458 762; black population 129,6°2 (28 percent). City is sixteer that regest in nation.
- 1930 1. 11 New Deal agencies Work. It agrees A uninistration and P (buc Works Administration execute nume out projects citywide, renovation, historic structures, rebuilding aging infractructure and documenting city a past.
- 1934-1938 Public Works Adr an stration movates French Mirket, restoring circa-1813 Butchers Mirket, reconstructing Bazaar Marl Carremodeling Vegetable Market, demolishing Red Store, adding Fish Mirket, and razing Gallatin Street for new Farriers Market and Flea Market profiles.
- Huey P. Long D. dge, first across lower Missis ... pp. River, links east and west banks of Jefferson Parish. Built for both railroad automotive traffic, bridge ends era of trail ferries and sparks development in semi-rural Jefferson Parish.

Hair-raising "Huey r" later proves inadequate for modern vehicular traffic; is currently under coins widening.

- State constitution authorizes city to preserve French Quarter. Vieux Carré Commission guards nation's second legally protected major historic district (after Charles an); but lings deemed archi eccurally and historically significant are preserved and held to certain standards. By saving city's iconic negation bedrook of future to urism industry and helps in the protection of other a storic areas.
- Chinatown at 1100 Tulane Avenue is razed; small Chinese mer in nt community relocates to 500 block of Bou. Son Street, where it survives in remnant form into 1080 is.
- 1937-19:3 Houng Authority of New Orleans (HANC) clears schooled his orice neighborhoods to construct subsidized housing projects. Six expansive creas, including former Storyville and portions of Trend and the unith Champer, are levilled isolated from street grid, and rebuilt (1940-43) with garden apartments to be rented at subsidized rates to the poor. Those on high relevation in the front-of-town are reserved for white romy; these in lowe of this in the back-of-town are black-only. Later populated almost exclusively by the city's porest African-Americans, the Iberville, River Gardin (St. Thourse), Lafitte, Guste (Melpomene), C. J. Peete (Magnolia), F. W. Cooper (Calliope), St. Bernard, Florida, Fischer, and Aburdance Source (Desire) public housing projects radically influence geographies of race and class in the late twentieth century. Viewed by many as "ware robises" for poverty and vice, some projects are demolished and rebuilt with maned-income New Urbanist designs in early 2000s.
- New C leans population rethes 494,537 black population 149,034 (C) percent). City is fifteenth-largest in nation, jaining slightly in rank due to repression eval migration from the all regions, WPA related job opportunities, and end opportunities relating temperatures war.
- 1940 L'isiant Airfield is established in solated truck-farming community of Kenner, to supplant Lakefront Airport. Own dip by City of New Coleans, Moisant begins commercial service in different Airport in 1960. Connected with city by Airline Highway, airport fuels growth of Kenner before East Jetterson Parch levelops. Gap fills in intirely with completion of I-10 and Vetorins Boulevard by 1970s. Air out is renamed Louis Armstrong-New Orleans International in 2001, but code MSY (allegedly "Moisant Stock Yards") remains. Airport's runway orientation and small size are now seen as of stacles to air traffic; new airport lites west and east of city are proposed in 1990s-2000s.
- 1941-1945 As natio. Trants World War II, New Orleans plays disproportionately sig-

nificant role in war a major ingress and egress for matériel and troops, base for ships and aircratt, and manufacturing center for Higgins landing craft (used during D-Day and ther amphibious assaults). Navy commissions Naval Air Reserve Air Base on recently constructed lakefront, making area beehive of activity during any years. Troops on leave in city help transform Bourbon Street and bohemian night posto world-famous and light district.

- bility in agion. Bushic River Road by tween New Orleans and Bato. Roage transforms from agrarian landscape of decaying antebellum homes to ne of pet ochemical fineries and industrial facilities. Region today is "In lustrial Corndor" to some, "Cancer Alley" to others.
- 1940s Diac's Crepar begin migrating to war-related jobs in Jan Crow-f. California.

  Railroad connections between the Orleans and Los Angeles rive latter city a significan population of New Orleans Creoles (a. well as Louisiana Criuns), which remains to this day.
- 1.12 German U-boat sinks Role t E. Lee near mou. I of Miss sippi, kill to twentyf ve, before it too is dostroyed. Other ener, y subs dis up shipping in Gulf of
  Mexico and bring war to Louisiana coast. Is in colonial days I w Orleans'
  osition on river nakes it valuable, but also vulnerable.
- 19.1 G.I. Bill, passed in anticipation of raillions of raurning afterans, provides low-interest lours toward purchase of new hories. Housing hortages in most American crass lead young families to settle a new serigheral subdivisions driving initial wave of post-World war II so burbanization. Infrastructure and commerce tollow new suburbanites, encouraging further urban sprawl. In New Orleans, most post-war subdivisions of coupy tow-lying terrain drained only recently of swamp wat.
- 1945 Geographer Gilbert F. Verite pullismes Human. Adjustment to Floods. Influer a listudy finds that it in made flood-control structures paradorically tend to increase flood dar iage by inspiring overcondence in the central of nature and encouraging humans to prove intensible risk areas ("Floods are 'acts of God,' but flood losses are largel, acts of it on.") So-called "level effect" occurs throughout coastal Louisia. It luring twentieth century, a syramp drainage and level construction create valuable in w real estate and lure more people into increasingly risky arms.
- 1946-1961 Mayor de Lesseps "Chep" Morrison oversees post-v ar modernization of city's infrastructure, "a rm of old-style political machines, and establishment of new commercial cass with Latin America. Brasi it is nspired City Hall complex, train station, airport, improved rail/street crossings, more buses, fewer streetcars, and bridges over both river and lake the among the changes of Morrison era.

New York City building czar Robert Moses submits "Arterial Plan for New Orleans" to guide me dernization of city's transportation system. Most controversial compoient intails connecting points east with West Bank by running elevated expressway in front of French Quarter. Funding arrives for "Riverfrent Expres by" in 1964, launching bitter fort among New Orleanians for calculations of each undamental notion of preservation and progress.

- 1946 Schwegn. on Brothe. Giant Supermar et opens on St. Claude and El, ian Fields; 1000-sql re-foot grocery store is city's first modern supermarket.

  Mor follow, er ouraged by increasing automobile dependence and light to subarts. Tren a eventually spell door, for most corner grocery fore, street venuors, and municipal markets. Tood retail, once micro-scale and spatially dispersed, becomes concentrated and less reflective of local food culture.
- 1947 Tenness e Williams' A Street a. Named Desire de bucs on stree. Play ins ils New (n. ans mystique and euse of place into a illions of undatergo rs and late a moviegoers; become on, st famous work of French Charter literary community, active in 1920s-
- 19.77 I ou teen years after region's first offshore ou well is dt lled, P e. lent Truman offers Louisiana. Il royalties and lease Lids for near-shore was and 37.5 percent of those faith rout. State rejects of fer in hour of more regrative deal, which never comes. Decision costs state billions of dollars over next six decades; is only partially remedied where 2006 law directs 37.5 percent of future offshore royalt. So four gulf states.
- 2747-1965 Upturn in propical activity produces eith nurricance affecting Louisian coast, including two serious scrikes to New Orleans paper.
- Late summer hurricane strikes. New (ri) and region while on northwestern track (w ard Baton Rouge Winds of over 100 in pin. buffet city; smalls orm surger roods lightly developed eartern rampa as of metropolis as well as Jeffett normal. Damages mount a \$1.00 million, fifty-one people pensh. Unround "Hurricane of it 47," as well as subsequent September 1.248 storm, happines additional level construction also glake shore and adj. sent marshes.
- 1942 (950s Federal Housing Act of 1949 leads to expansion of city's a bisidized public housing developments. Second-generation structures lack the local designs, solid construction, and internate set on its of original circa 1940 buildings.
- New Orleans population reaches 570,445, sixteenth- 15 est in nation; black population 181,775 (22 percent).
- Louisiana Landin, rks Society founded to preserv historically and architecturally significant structures; mission is later a panded to preserve historic neighborhoods and fight inappropriate development. Society saves many of city's famous buildings and fosters appreciation for historical architecture.

1950s Cut off by Industria. Canal, low-lying "New Orleans East" remains mostly rural except for incress/egress services along Chef Menteur Highway and citrus orchard, and recreational camps along Hayne Boulevard. First modern subdivisions appear along Dowman Road and Chef Menteur in the early 1550, follow by aggressive development in the 1960s-70s when Interstation is built. Inscallation of drainage system procedes urbanization; unlike the circa-1900 meters of the Industrial Canal, this one is designed to some under the lawy rainful runoff in lagoons and open canals, thereby requiring less pumping capacity to remove it to lake Pontchartrain.

- Brown v. Boar CEducation Supreme Court decision reverses locally cariginated 1696 Ples on Ferguson ruling or "reparate but equal" public schools. Ruling sees legal stage for end of de jure segregation of schools and public accommodations in South. During next decade and particularly after Civil Right Court in 1964. Jim Crow gradually disappears from structures, bus at department stores, schools, housing, restaurants, and facilities. Change conften accompanied by protests and tensions, but rarely violence.
- 1953 All but two streetcar lines Canal and St. Civir'es—are quicontinue! in favor of rubber-tire buses.
- Jinon Passenger Terr final opens near ore ent-day to yola Aver. 19. New station unifies (hence the name) numerous passen, extines are deads to closing of turn-of-century tations located the a ghout city, including two picturesque structures near Flench Quarter. Consolidation of railroace tracks within recently filled in New Basin Canal in its it-of-way leaves many old rail corridors abandoned throughout city, no no citil own of by railroad companies.
- 1954-1962 Old a iner Control Structure is built to rigulate flow among Missis sippi, Red, and Atchafalaya river addressing circa-1830s intervention which aided navigation interests but inadvert rity altered cystem's hydrology. One of worker great engineering o ojec's, "Old Rive" ensures that Missis sippi will not a bandon channel and jump and Atch rality (leaving New Orleans on evolgated brackish and) by allocating flow of government-approved seventy-thirty ratio between the two rives.
- 1955-1956 New technology of packing cargo into standardized containers and handling them in mass-production mode not a ship to truck or train rapidly transforms world's ports. Containerization ends centuries-of thoughtoners culture in porticities, alters gography of urban waterfronts and allows new small ports to compete with old major ports. With containativation, great ports no longer need great porticities. Port and city of New Orleans are deeply affected by new technolog
- Pontchartrain Park subdivision, with its distinct ve curvilinear street network and golf cours, is built in lakeside Seabrook section of Ninth Ward. First

modern suburban style development for black New Orleanians (funded by whites) draws midal class families, many of them black Creoles, out of historical neighborhoods to settle in eastern lakeside section of parish.

- Lir oln Beach, a lakefront recreational destination for black New Orleanians prombited the high Jim Crow laws from using nearby Pontchartrain Beach. Crems alout, Haynes Boulevard. An integral childhood memory of a generation of Allican-Americans, Lincoln Beach remains open until Civil Right. Act in 1964, rohibits in crimination at public facilities. A few vestiges of facility remains in ruins oney.
- Federal Aid Her way Act is signed by President Eisenhower, complending historic effort to build interstate his hway system. New Orleans is eventually connected to nation via I-10 and I-110 plus nearby I-11. I-55, and I-59. One of world's longest causeways conditions the rural St. Tammin, Parish with metropolitan Jeffeld on Parish, opening Piorida Parishes to a burban explansion. "Across the take becomes "the notto hore" in local parlance, partituarly after a condispantion opened in 1965 and exodus increases. Pegion's first mode at tunnels open on West Bank of Jenerson Parish, while I ow-informate "Carrollton Internange" is completed near Orleans/Fast Pank-Jeffeld on Parish line. Most an ajor modern transportation corridor and built in the fifteen reals following 1956, radically altering cityscape and unterligeography of region.
- 1958 First downtown Mississippi River I of ge opens. Bridging of river furthers West Bank development; comes at expense of more of nitroric structures in Lee Circle a ea Second span is enough to late 1980s, creating "Crescent City Connectic" and forming new foolic vista of downtown New Orleans.
- Navy releases air station from Fast Bank rake front recess river to Belle Chasse. Move incourages new dev Topment in bidge-accessed West Bank portions of Orienns and Jefferson parishes, at diffrings upper Plaquemines Parish into methor olitan fold. Belle Thasse van Air Schion-Joint Reserve Pase is now make thub of military presence in the error at a rea.
- 1958 1965 Mississippi River-Gulf Ontice Canalis excavated in St. Bernard and Plaquemines parishes. "MR-G." gives rean-going traffic s. orter alternate route to Port of New Orlean. and help, develop Industrial Canalias new center of port activity. But sevent 7-11/e-mile 1011, waterway also causes coastal erosion and salt-water intrusion requires cans and dredging, and the vides pathway for hurricane-induced storm surges to reach populated are so MR-GO plays role in flooding following Hurricane Betsy in 1965, and the amously after Hurricane Katrina fort, wears later. "MR-GO Must Go" becomes battle cry of angry flood victims and anywronmentalists nationwide at a 2005 catastrophe.
- After 107 years at historic Lafayette Square, C. Hall and government offices are relocated to new Duncan Plaza complex. International-style office build-

ings, built upon recently demolished back-of-town neighborhood that included Louis Armstrong birthplace, give city government more space and air of modernity. Ne voo aplex fosters growth of city, state, and federal government office district on expanded Loyola Avenue.

- Cultain revolution and insuing political tensions isolate Caribbean nation from Wes en world. New Orleans, chief sampling port to Bautista-era Cultaises many trade partner and centurie to I ties to former Spanish colony. Many Chan exilt cettle in city and state, drawn in part by sugar and dustry. When U.S. loos his trade embargo in early 2000s, local ports resume londling sign in ant shape of exports to Cuba continuing historic relations up to tween city and islam antion.
- 1960 New Orleans population peaks at 727,525, fifteenth largest among American cities; black population is 23 3,514 (37 percent). Sucurban Jofferson Falish population is grows from 103,075 in 1950 to 208,7 9 in 1960. Lought, hair of New Orleanians in 1960 reside above sea level down from over 90 percent a halicontury earlier. After 1900, New Orleans anothers in both absolute population and in relative rank among American it is s.
- Decade witnesses prefound transformation, in society and infortructure, affecting cityscape are ery level. Declining population (first time since early 1700s), diminished tax base, increasing crime, submission, banization, gentrification, and other forces leave in ericity with more decelict space, less public space. If were neighborhood stores, less interaction among neighbors and greater that all disaggregation for acceptant lines, even a de jure segregation ends. Traditional aspects of urban living—tidewalks teeming with shopper assoop-sit and, children playing a streets, but ling some markets—diminish or disappear entirely from city of prience.
- 1960-1964 Civil rights movement. Sourt or (e.s.) and Civil Rights Act of 1964 hasten end of de jure segregation of Nev Cileans. Long in process but now empowered by national movement, struggle for racial quality in New O is an scomes of head with initial the gration of public schools. Ugly street purests garner national attention, but city generally a only violence seen in other Southern communities. "White flight" begins in earnest, setting Orleans Parish on ongoing trajectory of population decline.
- 1960s-1970s Hispanic immigrants dispropertionately from Cul cand Honduras, settle in working-class and hiddle-class areas of Irish Cramel, Mid-City, and Ninth Ward. Most Hispanics live in Kenner, Metairie and Mid-City according to 2000 Census.
- 1960s Petroleum ind "dy rises; port economy mechanica". Coastal and offshore oil brings outside investment and professionals "New Orleans; triggers construction of to vntown skyscrapers and "Houstonization" of city. Container-

ized shipping technology replaces many longshoremen and sailors; requires less waterfront space and frees up riverfront for recreational use. As oil industry rises, port-plated employment declines.

- 1963-1972 Coast-to-coast I-10 is constructed through New Orleans. Major new infrastructure gives birth to an edern metropolitar area; fosters middle-class exodes and suburing grown in eastward and west, and directions. I-10 also dest opnamous recosted neutral ground of Norto Claiborne Avenue ("main struct of black Carole New Aleans") and leads to decline of old ingresses/cyresses, such a Airline Tignway, Tulane Avenue, and Chef Menteur Highway
- Civil dights Acoutlaws segregation in schools and public places. Blad ant Jim Crow segregation disappears from biblic facilities, ironically putting many integrated remiders out of business, particularly on Sould camparated Dryades streets. I fousing projects, seg egated de jure since them opening around 1540, soon integrate but then re-suggested de facto as whites leave for suburn
- Re lect ag nationwide switch from rails to buses and autosic aurbant. Isportation, all remaining street ars except historic St. Charitaline are commated.

  I lead twenty-five years mark low point in carry a nistory of orban rail vays; 1964 decision is later regreted and reversed at two of twenty-first convery.
- 1964-1°59 Federal funding arrives to build River. Ont Express vay, connecting bridge and CBD traffic with points east via French Qu. rter rive. Front and Elysian Fields Avenue Priterly controversal plan, originally record and ended by Robert Moses in 19-6, divides citizenry and motivate uniprecedented and ultimately successful campaign of resistance over next five years.
- Hurricai e Jetsy strikes Nev Crleans on in var y September, carring 1965 extensive wind damage and modding in th Ware and parts of Gentilly and New or eans East. Disas or kills e's aty-one on isianians, injures 17 600, and causes \$372 million and damage about one third in New Orleans. Betsy prompts Congress to a thorize Flood Control Act of 1965, which includes Take Pontchartrain in a Vicinity Hurricane Latection Project Italiaential act Lus federal government in the business of storm protection; e. tails improvement and construction of hurr cane-projection levees, flood calls, and gates (to what is now categorized . Category-3 level storm) to ore ect developed areas as well as adjacent marsles. Envisioned new flood protection (never fully executed) increases relestate values and inspires ne value construction in the very areas that floc led. During subsequent oil-board years, over 75,000 homes are built in places such as New Orleans East, raget of them on concrete slabs at grade level prisode demonstrates so-called "Levee effect" first identified by geographe Gilbert White in 1945: flood-centrol structures paradoxically increase flow damages, by luring home of yers into flood plains. Forty years later, Katrina's floodwaters validate White beservation.

Effort to compete with Houston and other ascendant Southern cities inspires widening of Powdras Street as "showcase" corporate corridor. Numerous historic structure, are azed on lower side of street. Plan foresees need for major traffic-generating anchors at each end of Poydras: Rivergate Exhibition Hall (190) is built triver end, Superdome (1975) at lake end.

- 1966 Cimultane of erection of International Trac. Mart and Plaza Tower, city's incodern shapers, cymbolizes increasing oil-related wealth and new thing technology. Projections are selected to spark competing skyscraper characteristics. In Poydra and Loyola, respectively. Poydras ultimately prevail.
- Sai. NFL fra whise brings profess, and football to New Orlean. In a sking it a "big league of y" mentioned in the rts media in same breath as Dallas, Houston. Atla in and other competing cities. But a small rividet, do in ing population, and now per-capita income make city struggle to maintain big league?" perception. In early 2000s, Coints threaten to relocate to San Latonio and insisting appropriate to graph of the control of the sist appropriate to maintain and control of the sist appropriate to popular with regional residents, particularly after Hurricane Corina.
- 13 C8 If ivergate Exhibition Hall is constructed at foot of Canar and Poyntas streets.

  Bold freeform design odds stunning new variation city's premital intersection;

  turtures convention rade and foster development of skyscrap rehotels on lower Canal Street in early 1970s.
- Congress create? Nation Flood Insurance Program, pricing coverage at below-market rates a encourage participation. Program creates bonanza for real estate interests by encouraging decopment of flood zones, including coard areas popular with wealthy second home a wers.
- 1960s-1970s Ten blocks of historic Tremé, ir cit ling many early-nineteenth-ce, tury ver actular houses, are 1 veried for Theater for a erforming Arts and 1 ouis Art is a ong Park. Contro is cial url an acnewal project, which displaced over a thougand residents, trail forms F ubourg Traine and is now regard a by many as a mistake.
- 1968 1>69 After holding steady at 4.00.0 an wany since Brown v. Sourd of Education (1954), white student (nr) llment at New Orleans public schools begins steady decline, while black annollment doubles to 70,000. White exodus to suburbs and entrenchment of black anderclass in Orleans Parish eventually lead to de facto re-segregation of New Orleans public schools. System that was one-to-one black-to-white in 1957 becomes five-to-one by early 1980s and nineteen-to-one in (2.1 2000s.
- New hotels are promibited in French Quarter, in a tempt to balance tourist and residential use. Base eventually encourages now notel development on Canal Street, CBD and Warehouse District. Attempt in 2004 to rezone parking lots

riverside of North Peters for new hotels may foretell new construction in this area.

- Federal cancellation of bitterly divisive Riverfront Expressway project saves French Quarter's frontage with Mississippi; makes New Orleans one of first American cities to resist autionwide trend toward elevated expressways along without the same control of the same
- 2009 Catego v-3 Hurri and Camille strikes coastal Mississippi, obliterating some ficant portion of had oric Gulf Coast. New Orleans suffers some wind and moding, but is mostly pared what might have been a catastrophe.
- New Orlear s population decline to 593,471; black population 257,478 (43 per cent). City fulls in rank from inteenth- to ninete and-largest to nation, at the time and largest ten-year drop in its history.
- Jazz ar ( Teritage Festival sheld at present-day Congo Chare. Created by Messachusetts-born George Wein, inventor of the modern and is essential festival. Event grows into annual New Cheans Jazz and Herrit ge Festival (Jazz rect), now shand only to Mardi Gras in the cultural-to-time economy. Festival provides important venue for local musicians and helps instill "Lew Orlean, sound" as essential part of Aractican "roots" music; performs similar service for Louisina food. Event's location at Fairgrounds in Gentilly roules are helps expose traditionally Freich-Quarter-bound loitors to non-tourist reighborhoods.
- Friends of the Choildo publishes New Orleans And hitecture. Volume I: The Low er Garden Listrict. Study inspires we appresiation for historic architecture outside French Quarter and Ganden District, sets scholarly tone for local hit torical research and stirs modern preservition movement. Nomenclature and boundaries used in series (currently eight volume, strong and growing) help revive his torical place names and affect public's year eptions of place.
- 1971-1972 Gravanized by corstantion of ont-of-scar. Christopher Inn Apartments and impowered by surroquent historic district zoning (first since Virux Carré vir tection in 1936), and dents emblish Faur ourg Marigny Immeric ement Association. Group participates in political process, with eye toward nistoric preservation and neighborhood improvement; inspires residential other historic neighborhoods, leading to both revitable ation and gentrification. Old French term "faubourg" is revived in neighborhood nomenclative and adopted by real estate industry and please. Faubourg Marigny begins transforming from mostly working-class in ighborhood of natives to professional-class neighborhood of transplants, he omes city's premier gay neighborhood.
- 1972 One Shell Square 697 feet high and resting ~ 200-foot pilings—rises as tallest structure in ity and lower Mississippi <sup>y</sup> al ey. Symbolizes apex of 1970s oil boom.

Last full-scale Mar in Cras parades roll through French Quarter. Increasingly elaborate Carnival celebrations, including new "super krewes" (starting 1969), create safety havare in Quarter's narrow streets. St. Charles Avenue becomes new route for most parades; French Quarter is left to inebriated revelry and leviness. Note borhood krewes gradually abandon their local parade route and centralize along standard St. Charles route even as parading tradition duffuses to such os and be, and other "throws" grow in popularity, and now produced by industry (though trinkets are mostly manufactioned in China). City's Mardi Gras celebrationed hers modern age during 1970, as a major courism-univen civic ritual attracting a nationwide audience

- Second-word vussissippi River for a on record threatens region. Od River Control Str., are is damaged and later enlarged; Ponnet Carré Spillway specied to reneve pressure on levils.
- 1973-1 774 Cunt and Davis archite inval firm issues New Orleans Howing am. Neighbor wood Preservation Study. Landmark document identices and dear eates sixt, the official city neighborhoods, based on historical perception natural graphical barriers and major transportation arteries social and conomic patterns, and census tract boundaries. Effort afters per or tions of 11 ice, space, and nomenclature in city; marks modern era of city planning. Designation of national and local instoric districts such ag in 1770 further trend toward perceiving neighborhoods as discrete bounded, officially named entities with mutually agree Lupon characteristics.
- 19.0s Renovation es ores historic Fren. <sup>1</sup> / Jarket et a cture transforming complex from city rearketplace vending cool stuffs to locals, to festival marketplace premarily or rearted to visitors.
- 1970s Post-Parsy flood control, Interstate 10 Industrial Canal, NASA Michoud plant, and new subdivision, make evit rn New Orleans hot new real estate marker, led by "New Orleans Eas. 1. Industrial Canal, NASA Michoud plant, and new subdivision, make evit rn New Orleans hot new real estate marker, led by "New Orleans Eas. 1. Industrial Canal, NASA Michoud plant, and new subdivision, make evit rn New Orleans hot new real estate
- Preservation Resource Center is founded Local non-profit grown, jects preservationist and "liveable city" philosophics into city discourse; her omes most influential group advocating add tive reul hof historic structure and improvement of old neighborhoods.
- First "magnet schools" for red in New Orleans public sclared system. With fifty-fifty black/non-black ratial quotas, magnet schools are designed to prevent further white flight. Red rively small number of white students tends to cluster in a few high-achievers schools, which soon become rost racially integrated in city. Controversial quotas are banned in 1998 after protests; magnets later called "Citywich access Schools."
- 1975 Moratorium is imposed on demolitions in CBL, after scores of nineteenth-

- century storehouses are razed for skyscrapers or parking lots.
- Louisiana Sup rdo ne is completed, marking peak of city's competition with oil-rich Houston. Opectacular domed stadium transforms skyline and breathes new life into CBD. Superdome serves as venue for high-profile events, publicizing city and its attributes to nationwide a diences on a regular basis.
- Late 1970s Vietnamese referees from post-war communist Vietnam arrive to Nov Orlean, on invitator of Catholic Church. Archdiocese settles hundreds of mostly Catholic and in spots on West Lank. Versailles settlement forms unique neighborhood, one of city's most related and purest ethnic enclaves, known for elaborate multiture market rai lens and open-air Schurday market. Neighborhood functions as nerve can prior Vietnamese a remunity dispersed to oughout entral Gulf Coast region.
- Riverfrent promenade "Nonwalk" (honoring progression Mayor Moon La drieu) opens in front of French Quarter Signifies change of rendfront use from port activity to recreation, as contral erization and Industrial Canal Coc. s concentrate and relocate shipping facilities off lats issippi
- Late 10763 New suburban (a. divisions encour ter inwelcon e proble. ir. former Jef/erson Parish backswamp: soil sinkage. Su'sidence of recent y drained hydric
  soils causes structural damage to thousands on tew ranc. houses built on
  concrete slabs (i.e. ie makes headlines through ut ate 1970) particularly after
  some house splode when gas lines break fow piling based construction
  standards are subsequently adopted, but so is continue as sink.
- Lawsuit (le) by environment (g. oup successfully prevents Army Corps from building gates at mouth of Lake Pontolian rain, a mod-control measure convisione (g. 1964 to prevent from surg, from en enig lake. Corps latera grees to receive heights instead. Such an apparatus theoretically would have prevented Katrina-driven the aches on la leshor outfall canals, though not those on eastern navigation, at als.
- 2017 City, now majority-black for i s. time since 1830s, elects first plack mayor, Ernest N. "Dutch" Morial, descendent of Creoles of color, like many city leaders today). Mayor Morial serves from 1978 to 1986.
- Late 1970s Audubon Zoo, con a cted mo. by during 1920s-3t and considered an out-of-date "animal prison" by modern standards, is refers gned and expanded into national-class zeo agical attraction and research to lity.
- 1980 New Orleans population declines to 557,515; bla population 308,149 (55 percent). City is low twenty-first largest in na'. n.
- 1980s Cajun ethni www.val changes New Orleans tourism. Newfound appreciation

of Cajun culture is  $\alpha_{\rm L}^{-1}$  oited by French Quarter tourism venues; Cajun dishes, music, shops, ar  $^{-1}$  so amp tours become standard part of visitor experience. Chef Paul Pruc hor me gains celebrity status through introducing nation and world to spiced-up Louisiana cuisine.

- 1983-1984 Corldwide oil crash hits city; devastates Gulf Coast and other petroleur seed eco whites. Lest costs New Orleans housands of white-collar jobs. subseque. Tyears and initiates dark era of the loss, middle-class exodus, and increasing crime to swhich endures us til mid-1990s. Louisiana's till and gas-tillated emp oyment plummets from nearly 95,000 jobs in 1981 habout 41,000 in 2000.
- I puisiana Voi d Exposition is Lele along present-day Convention Center poul'evard, an nundredth anni en ary of World's Inclusival and Cotton Centennial Proposition at Audube a Park. Like its predecessor, "Vorld's Fair foils financial, but helps laund, economic development in downtown in a reint oduces citizens to rive ment. Historic "War the use E sanct" is reviolized into envention, hotel, condominium, and arts district in subseque a wears, as a timer fair structures are converted into Erresi N. Moria. Convention Centernial expanded to over one million square feet. Residential persilation of CBD/Warehouse Pictrict climbs from an der one hundred in 1980 to over 1,300 in 2000.
- Mid. Late 1980s Corps aises heights of circle level system but neglects to account for new resear is on increased storm strength, large height, coastal erosion and soil subjudence. Concrete flocing alls are encircled along riverfront and outfall canal levees, but some are boilt with insufficiently long sheet piling. Corps plans for a otterfly gates" to present surght on entiring outfall canals are opposed by sewerage and Water Board and Levee Board, because they would reduce the lility to pump rain water out of easy. Should be of flood-protector system are revealed twenty to restaurch and Hurricane Katrina.
- Mid-1986's restival marketp 'ces," like the pione ere I by James Rouse of en along varisissippi River. James Rouse of en along varisissippi River. James Rouse of en along varistissippi River. James Revers of Rivers of Rivers of Reversion of downtown riverfrom once received for maritime use. New Riverson Streetcar (1988), first new line in decades, connected brench Quarter with new attractions and Armest N. Mo, ial Convention Cen. v.
- Unusual late-October Haricane Jan floods coastal refer, including portions of West Bank. Incl.' at leads to raising of levees a'c an metropolis' southern fringe.
- 1985-1986 New Orlean East land-development compary oised to urbanize over 20,000 acres of vetlands in eastern Orleans Ports. fails amid oil bust. Land is transferred to federal government and becomes Bayou Sauvage National Wildlife Review, reflecting new appreciation of once-scorned marshes and

wetlands. Had are a veloped as envisioned, Hurricane Katrina's toll in lives and property would have been even higher.

- 1980s-1990s Numerous generations-old downtown department stores and restaurar Holme's Krauss, Maison Blanche, Godchaux's, Maylie's, Kolb's, and others—fold hue to rull'le-class exodus, growth of suburbs, crime concerns.

  Priking or unk, and the of tourism. Building are often converted to hotel 12. growing a spitality in Justry.
- Pop: John Paul T's visit reaffirms New Orleans' place among nations breat Cathonic population centers; draws pridwide attention to city's least Cathonic Can-Amir can population.
- 1)87 The Big Easy Lovie popularize new nickname for C.; introduced around 1970 from sirca-1900 origins and now more preval at than circu. 1835 "(Cocent City moniker. Loaded with clichés and ste ectypes, 116 Big Fas, portraye Nov Orleans as eccentric, corrupt Cajur supost obsessed with lood and fessivity; helps stoke to crism boom of 1990s.
- C. 'G Tower is constructed next to Superdon.' I Twent, three years after erection of first modern by gravises, New Orleans hast office Lyscraper. I date (later named Dominical Tower) symbolizes a clining petroleum blated wealth. Sixteen years later, following shift toward tourism. Do nald tramp proposes 700-foot-high tower for Poydras Street—but to condominiums and hotel rooms, not off cast As of 2008, Trump investment is still promised but not yet commenced.
- 1990 New Orlean population drops allow half-un lion reark to 496,938, ranking a twenty-four h largest city in nation; black per pulation is 307,728 (62 per part). Jefferson Parish population declines for 1 ast time, from 454,592 residence in 1980 (148,306 in 1990, due in large, part to oil cash.
- 1990-1991 Coastal Wetlands Planting at diaptection Act ("Breaux Act") brings federal funds to Louisian for coastal restoration: Caernaryon Fresh valer Diversion opens below cm, 6 st major affort to recerse salt-water in rulion and reliable wetlands around New Creans.
- Early 1990s Race relations deteriorate amid to publish economic times. Tensions are also a product of gubern torial candidacy of former Klansman David Duke, Mardi Gras krewe integration conceiversy (which movinged three old-line krewes to cease part ling), protests at Liberty Place in onument on Canal Street, and record-high crime rates. Problems are exact bated by lag between decline of oil industry and rise in tourism/service at Snomy.
- 1990s Formosan term. infestations explode acros ity and region. Accidentally imported on shipping palettes from East Asia uring World War II, invasive termites three in housing stock (particularly historical structures) and urban

trees; cost city hun and sof millions of dollars annually in control and damage costs. Threat leads to increased use of steel and aluminum in new construction and renovation

- 1990s Hydricane evaluation planning transforms radically. Coastal erosion, subsiding this poils, rising seas, and an upswing in hur icane frequency ends traditional antion of waluating internally to sturdy solvols and shelters within city in the Now, crizens are unged to evacuate er time region in their own automobiles; rural countain resident, who once evacuate the poor and others without cars a piever fully a ticulated a tragic oversight that would cost hundreds of averduring Katrma in 2005.
- 1)90s-2000. Decarring population for a starchdiocese to clare or reduce services at numerous historic churches, at the of which are partially converted to hold as for age at Many religious elements of historical city cape fall should as local lamilies relocate to suburbs at a coung, secular transplants. Two into o'o'r eighbor, and s.
- (at gory-5 Hurricane Andrew, first of 1950s-2000s wive of megrations, pulverizes southern Florida and southcentral inquisiana. New Orlding is spared, but begins to recognize augmenting the patter storm subgestaming coast. Andrew ends notion of "riding out" storms in study, old schools; ushers in era of metropolitan evicuation. Light with a in city pause surprisingly heavy damage to live oaks, reading to discovery of extensive formosal fermite damage to urban trees.
- U.S. Environmental Protection Agency ... 's Upper Ninth Ward neighborhoods of Cordon Plaza, Press Park, and Enterty Tenace as Superfund sites. Once this garbage dump from 1900s to 1960s "Agriculture Street I ... trill" was later covered with tops. I, developed, and per ulated with working class, mount plack, families. He is eveloped and the contaminants in foil forced school closures and tensive clear up during 1990s-2000s; many residents resisted remediation in fivor of more costly colution of buyouts. Controversy garners attention of nationwice cavirons and justice movement.
- Circa 1995 "Renaissance" begins V or t of local recession passes; national economy heats up; convention and tourist trame increases; crime rates begin to drop after 1994 peak. But datage is acres white-collar petroleum jobs retreat to Houston; blue-collar poor jobs are largely replaced by a commation. New Orleans becomes a tourist-oriented service economy.
- May 8 storm du pos up to eighteen inches of rai val on metropolitan area; some areas get velve inches in single hour. City's verst rainfall floods 56,000 homes and businesses and causes \$761 millio. I damage throughout twelve-parish area; vals to half-billion dollars of mostly federal funds for new drain-

age projects. New Orleans increases pumping capacity with new pumps, canals, culverts, and backup generator, from three inches of rain every five hours to five inches it five hours.

- Ar id protests, architecturally significant Rivergate Exhibition Hall is demolished for Home his at few of Canal Street. Cosino, opened in 1999 after turbulant construction period, is predicted to transform downtown, but eventual settles incommodest higher between traditional French Quarter tourism and emerging Wareho of District conventor trade. Gambling in New Orleans falls well short of exuberant expectations of early 1990s, indicating that visitors are more a terested in enjoying city's unique attributes that in increasingly ubiquitous 'gaming' opport arities.
- 1995-Prese, t Upture in tropical activity rakes hurricanes a rater of nearly constant public apprehension during such mer months. Store to reats with partial of the tall evaluations occur at pace the nearly every other year during this era. Persistent sense of uncertainty—via à-vis eroding coast, subsiding soils, riture seas, and raming climate—lads many to ponder the slore-term viability.
- 15.6 I rightfield vessel collides with Riverwalk . (211, causing 11.) fatali (1.8 but demonstrating risk of converting shipping what vest to public recreational and compercial uses.
- Lac 1990s-early 2000s. Hotel capacity, mostly in CBD and Warel, use District, skyrockets to 37,(0) rooms, to accommodate nearly ten milio 1 annual visitors.

  Numerous haboric structures in CrD and Warshous. District are remodele into "boutique notels."
- Late 1990s-early 2000s Scientific community and the coastal erosion is to public attention. Increasing numbers of New Orle, mans begin to undersund connection between river, coastal worlands, and coay's sustainability, so citety graphs is with possibility of city's more unity.
- 1998 City narrowly avert Furricane Georges. Fer inder of inevital inty of "Big Ore," Georges teached essons a evacuation planning and street looding in Mid-City area.
- New Orleans Arena opers all ning to commodate event to b big for other venues but too small for learby Superdome. With seating for 16,000-19,000 people, indoor arena succeeds in all octing Charlotte Ni. Cranchise Hornets to city in 2002, plus it merous other entertainment at 3 s orts events.
- 1999-2005 In span of six year's dominant player in city's growery market shifts from Schwegmann's to Winn-Dixie to Wal-Mart, reflect. It transition in city's business sector from locally owned companies to a ground and global firms. Televised media market saw similar transition over recent decades, from local to out-of-town venership. Though local enterprises remain more common here

than other cities, they comprise diminishing percentage of citywide economy, showing increasing influence of national culture in local urban life. Trend is partially reversed a ter Katrina, as Thibodaux-based Rouses expands into local grocery market (2007) and New Orleans-born Saints owner Tom Benson buy. Fox affility WVUE (2008).

- 2000 New Orle it's population declines to 484,6% thirty-first largest city in nation black population is 525,947 (67 percent 1.2 000 Census finds that metry, outan areas most eth. cally diverse census tract is Fat City in suburban Metallic, while least dive secrect is in inner-city Lower Ninth Ward—exact prosite of and er time a Thirty-eight percent of New Orleanians now reside an ove sea level, down from about half in 1960 and over 90 percent in 1910.
- 2.00 Der ay Massum opens June 6, creating critical mass of cultural senues near Lee Circle. Museum District own comprises Ocaca and Civil War milestums, Conference Arts Confer, and Julia Street and galleries. Lightly occessful actraction, renamed National World War II Wasseum, undergoes on ssive expension starting in 2007.
- (In of largest mapping efforts in state his ory entails measurer (i.) of topographic elevation through "light detection and ranging" (LIDAT) technology. Tigh-resolution elevation maps of citizant region is leased to the public incrementally throughout the 2000s, dramatically it in trace effects of subsidence and coastal erosio. Datasets prove that in measuring depth of Hurricane Katrina floodic that 2005.
- philosophy (sixth version of a circa-1990 N.S. How is a and Urban Development program called "Home vnership and Opp or unity for People I verywhere" entails ending contentration of poverty in isolated public-Leusing projects by replacing them with New Jrbanism inspired settings, while integrating poor families projects by replacing them with New Jrbanism inspired settings, while integrating poor families projects is redented in the mership. The sire, St. Thomas, rescher, and offer housing projects are demolished, to tears of some displaced residents and cheers of those who view are mas as a latters of poverty and crime. Relocated families carry elements or "projects culture" into residential neighborhoods, sometimes resulting in tension and gang violence. I was construction, exhibiting revived historical architectural styles, begins on former St. Thomas site. Nearby Wal-Mart is subject of the ter controversy involving issues of preservation, gentrification race, jobs, corporate subsidies, and new "tax-increment financing" (Tir") concept.
- **Early 2000s** Popularity of Towntown condominiums grow, driggering conversion of numerous historical structures and proposals for lew Sunbelt-style condominium towers. Out-of-town buyers help drive up a cal real estate prices and in-

tensify gentrification, ressure on adjacent neighborhoods. Post-Katrina woes and cooling of regional housing market temper condo trend in 2006-08.

- ap ... then convolex, re-engineering of Tchoupitoulas and Religious streets, pew ... Wal-Mar and Riv. Garden development, and renovation and demosition of old vic rehous a make area one of nation's most transformed inner convertions. Projects to flect city's ongoin, "r -discovery" of river.
- Terrorists attack American targets. Enough homeland-security efforts view New Orleans as up ten" potential target, for its port, petroleum facilities, and may republic events. New security measures are enacted, affecting riverfront development plans.
- 2003 New Orleans population drops to Depression-eral or of 469,000, representing loss of over 15,000 since 1000 (greater drop than during intire activate of 10900). Fastest-growing parish in region is 50 tammans on north shore, which surpasses 200,000 to first time.
- 2003 Parists spend over four billion dollars a year in Orleans Parist, generating over 61,000 jobs. Vicitors to New Orleans account to 44 percent of state's tourism economy. Chand gas sector fales in uch worker city's Elven-Mobil office relocates to Houston, continuing twenty-year trend of perceicum industry forsaking New Caleans and Louisian. For Houston area.
- Two-hundred the anniversary of Louisiana Purchase of lebrated December 20 in front of Cabildo, site of original formal transfer of Louisiana from Spain to France to Caited States. Visions of city's greatness from early 1800s fall with declining relative importance of waterboard transport tion in America. Once strategically located at sole maress/egrees to No. th American interior, sity now can petes with innumerable transportation uptions. Lack of in dustrial devalument, relative is mation, Civil War, one reliance on river (and later of a cocial problems, and other factors exact roate city's woes. Poor, undereducated, physically an rable and losing per alation, city relians acreasingly caselling its past to visions.
- New Orleans population d clines to 462,269, barely ahead of jefferson Parish's 453,590. City proper is now how to only 35 percent of seven-parish metro-area population, do in from ou percent a century or lier.
- Success of 1988 Rive front line inspires reintroduction of streetcars to city's transportation system. Major new routes are install of an Canal Street (starting 1997) and Catallicon Avenue, designed to circulate tourists throughout city and foster randomining. Much-anticipated canal line opens in April 2004 and succeed in invigorating Mid-City ou inesses. Additional lines are foreseen for the areas to jump-start neighborhood restoration. Hurricane

Katrina derails most fforts, as floodwaters damage new streetcars and rearrange priorities

- Major new contamerized shipping facility at Napoleon Avenue wharf, coupled with environmental problems on MR-GO and bottleneck lock on Industrial Canal, returnshiver to position of prominence in local port industry. Opposite that she forese end in 1970, when "Centroport", as planned to shift most business MR-GN/Industrial Canal wharves. New uptown facility also concertaites port activity and finess up antiquated downtown wharves for other uses
- Category-4 Hurricane Ivan spares ("v but devastates coastal Ala" a. New "co. to flow" plot, devised after Hurricane Georges in 1998, open up incoming interstated nest to outgoing eracuses. Horrendous traffic jams lead to remine nent of vacuation planning Ivan's sideswipe but as additional attention to urger v of coastal restorators; in retrospect, serves as "down run" for next year's Intricane Katrina.
- 2004 2005 Cit holds "riverfront charrette" to gather it, as for near land us from Poland to Jackson avenus. With port activity now concentrated in uptown containerization facilities, city and develop its eye about med with esfor replacement with recreational/tourist use that memores in which fort of New Orleans relinquish is its maritime servitude of rivers ont to city in exchange for percentage of land sales and leases. If enacted, agreement would open up over four miles or liverfront, from By an er to Lower Garden District, for massive redevelopment, mostly for recreational us. Rejuven ted in 2007-08 as "Reinventing the Crescent," effort he wipport is \$30.0 million from state, local, federal, and private coffers to rand new public green space.
- Pentagon commends closure of Naval Support Actuaty in Algiers and Sywater. Twin locations straddling Mississi, pi made mintary sense when in fallation was created, but proved to be cost of obstacle in modern times. City's loss of up to 2,700 jobs may to nitigate it by growth of Naval Air Station in Belle Chasse and creation of aderal capitaries terminal, and other a silities and an entities in vacated to from properties.
- Following Hurricane Ivan trafility and sacle, new "contrafic v" evacuation plan is unveiled. With coas a oding, levees subsiding, set level rising, and fresh memories of hurric new Georges and Ivan, local officials and populace treat hurricane evacuation planning with paramount in no tance. New "contraflow plan" involves excuating most vulnerable are a first, then diverting out-bound traffic on to in-bound lanes at four complex intersections, giving evacuees six different escape routes to safety.
- **July 2005** New Orleans population estimated at 452,17° ac yn by 10,000 in a year and 32,000 since the 2000 Census.

August 23, 2005 Low-presser e system develops over southeastern Bahamas; loop current brings when subsurface waters from Caribbean into Gulf of Mexico, where sea surface to mperatures hit ninety degrees. Topical Depression 12 becomes Category 1 Hurricane Katrina; makes landfall near Miami on August 25 and enter on the warm waters fuel in creasing wind speeds.

- August 27.28, 20(5) Hurrica. A Ratrina strengthen. O Category 3, 4, then 5; fore a character westward, then stabilize on 1 ew Orleans-area strike. City and region p. Spare for worst: residents board up homes and businesses, Strength close Goodgates and activate "contraflow" system; hundreds of thou ands of residents evacates. Those who will 1 or or can not—around 100,0 10— remain home or take refuge in Superdor. Initial feeder bands arrive as and day of pre-Katrina 1 w Orleans draws to close.
- Augu. 29, 2006 Flurricane Katring, with diminishing Category 2.2 winds but an enormous residual-Category 5 storm surge, makes landfill as dawn in barataria. Basin, passes immediately east of New Orleans, and makes second landfall as and 10 a.m. along souisiana/Mississipti bordes. City enduses necest winds between 8 and 10 a.m., causing extensive structural damage or rge raisect all levels by tentoral irrty feet and lake tends by nine eet, ravaring coastal as as to east. Lakefrone levees endure as sure, but lower-quelity navigation and outfall canal levels and floodwalls as a vertopped or rover whemed. When winds die down in late afternoon, most people or mise that city "dodged bullet." In fact, multiple levee breaches let alt water frown as expanses of metropolis.
- August 29-Septem per 4, 2005 Rising Jenuge from Jovee breaches turns windy disater of Kran a into watery catas Tophe of Univerced en ed proportions. Filthy floodwaters engulf entire raighborhow's. Thou ands of residents, mostly poor (s.c) black, are trapped on rooftops or in a merdome and Corvertion Cerue with no food or water. Looting shooting and fires break out citywide. Confused, delayed federal espoise est acerbates affects of inadequate planning at that and local lener. Shocking physical and social disintegration of New fire eans leads news suches world tide for weeks. Supplies, but es, and troops inhally arrive by weekend, branting characteristic under control and evacuating last residents. One week after Krana, city's population drops to mench colonialera levels; in some neighborhoods, damputnumber living.
- September 2005 With a million citizens of Sutheastern Louisiand and coastal Mississippi scattered nationwide, "ghost city" of New Orleans begins long, slow process of recovery 1.5 ters are pumped out faster that expected, electricity returns to selected treas, and some residents return at end of month, even as rescue squads dis over more dead. Damage to his pric district on high natural levee is mostly wind-driven and repairable; that er-caused damage to twentieth-century and borhoods near lake and eastward into St. Bernard Parish is

utterly devastating

- September 23-24, 2005 Second "storm of century" in one month, Hurricane Rita, strikes Louisiana, Texas border region, destroying communities on southwestern Louisena coast and raising gulf and lake levels in New Orleans area. Some hastily paired to see breach again, re-thooding Lower Ninth Ward and a liacent a ear. Communities in western Louisiana suffer similar degree of construction, seen in east luring Katrina. Nearly half of Louisiana's population is directly effected by storms; economy and infrastructure is in shamble.
- O(\*5) er 5, 2003 Residents are permitted book into city everywhere excrete Lower

  Nin's Ward, though only those in ingher areas near river have bosic utilities
  and service
- Mid-Oct ber 20.2 Army Corps pumps cut last traces of K 'rua's and T a's surges.
- Late O tober 2005 Hurricane Wil no, third Category-5 sorm in gun in under two menths and most intense burricane ever recorded in region, strike of orida and mexico. Together with Katrina and Rita, Wilmale and dramatic coedence to merging worldwide discourse on global virining.
- ate Au. umn 2005 City struggles to regain for ing as citizens grapple with decision no return, remain in Ti MA-funded evac at on site, leave forever. Commissions form at local and state levels to devise phas for city's future; scores of public meeting convene to discuss and debatentess. Orlans Parish population during via autumn doubles to roughly 144, '90 a Cer Christmas, as fami lies return dering school break. Cit, xudes at nosphe no frontier town, with small population, high male-to-finale ratio, attremaly few children, large ou of-town we kforce, ubiquito is military to a ence, cu fews, and cash-1 ced economy. Whites outnumber backs stost intially, "wer economic classes are nearly the sent, while Hisparic immigrant worke sarrive in large number and con v. e daily at Lee Circle to await lawerer jobs. To cally owned businesses retunent much faster pace than nat one chains, Magazine Street becomes city's nam street." Local can number tourists in Lench Quarter, vibic suffers fi-.....icially because of cancellation of all conventions. With criminal element evacuated, once-violent city becomes one of safest in nation, while crime rates in some host cities increase. O rerarching rebuilding question draws passionate debate: should city abandon heavily a maged eastern and lakeside subdivisions and rebuild primarily on high reground, in expecta to 1 of smaller population? Or should city notation prediluvian urban foot or at under philosophy that planning for porulation shrinkage will only guan tree it? Despite heroic progress in clean-up and repair, New Orleans remains two cities divided topographically: highe areas near river bustle with act. Ly; lower areas near lake remain dark, emp 'v, and devastated.

Autumn 2005 to Pr. se in Steady stream of religious groups, college classes, students

on break, and civic and professional organizations from across nation arrange "voluntourism" wisted to the city, helping gut houses, clean parks, and build homes in collatoration with local citizens. According to Corporation for National and Community Service, approximately 1.1 million visitors performed for the entillian hours of work valued at \$263 million during two years following storm, with page increasing in second year. Remarkable phenomenonis viewed at 4 jumph of civic spirit over by reaucratic lethargy.

- Autum 2005 to Present Codedy repair of storm damaged I-10 "Twin Spans" reconnect. New Orle ins with points east; is followed by construction of new higher I are sidesign. I to rise above mas ave surges on rising seas. Mos My 1 derally funded effort is targest transportation in project in Louisiana history.
- 2) 105-Prese, t State intervenes in city's a rg-troubled public e trication whem, left in disarray fiter storm. Most public schools are now funded the control of Recovery School District of semi-autonomous charter on the sistence of the most charter schools strive to first students city fide, forming one of the most competitive public-school markets in the nation. Nevertheless, abyonal public ducation continues to underlie city's most fundance all problems.
- Janua 1. 2006 "Bring New (rle ans Back Commercial "unveils nitial reconsemendations for consideration by Mayor Ray Nagin, state's Lour, iana Rowery Authority, federal officials, and public. "Action Food for New Caleans: The New American City" recommends is moratorium on rebuilding in heavily I maged low-lying areas; delineates thirteen planning districts and suggests forming neighborhood associations within each. Associations must demonstrate that at least half of households will return by May, (see eight on bod would be bought out with federal help and cormeted to mark or commercial zone. Plan also recommended to the action of the process of city government, authority. Dioposal for light rail lines, bike trails, and barks are practically lost amidipulic responde to potential neighborhood cloures, which ranges from outrage to reluct a trapport. Chargos fracism, in clining, land-grabout g, and ether ic cleurs affly from plan op to ents, while supporters speak of safety, read to and progratism.
- January 2006 Mayor Nagin rejects bey recommendations of Bring In a Orleans Back Commission. Unwilling (and probably legally unable) to chose down far-flung, low-lying suburbs in farour of safet, higher areas, mayor apts for laissez-faire approach to rebuilding the people decide for them are and government will follow." Decision a jects notion of shrinking the mean footprint, recommended by experts and wildly unpopular among vecal citizens and politicians. Incident demonstrates once again that disaster vecams, shaken by tumult and craving normalcy, usually resist radical change even if it promises to lower future risk.

**February 2006** First post Karina Mardi Gras unfurls with small but enthusiastic and predominantly local crowds; festivities demonstrate city's ability to handle major functions. National and international reaction, initially skeptical, warms to care of end a ment and admiration.

2006 Civic spir of d fear of nootprint shrinkage" inspires thousands of citizer's community of the product of the spirit and associations citywide. Countless meeting, product or ries of neighborl of 1 plans, many highly inspired and large year without mancial or professional support. Impressive level of passionate and engagement proves to be Kaulina's silver lining.

Coring 2006 Campa or for mayor and city of uncil, postponed during chootic autumn of 2005, samers national atternity as bellwether of city's post. Quitan racial and political makeup. Over two ty candidates, mostly whiter vie to replace Mayor racy Nagin. "Footprint gebate" becomes politically volutile; no of candidates advocate rebuilding entire city. Mayor Nagin and an Gov. Mor Landrie espectively black and white, prevail in April election, in which thouse of displaced residents vote in statewid the lloting focutions. Despite dire was hings, election proceeds smoothly. Mayor Nagin's vistory in I hay run-off election, as well as council and congressional outcomes, continue era of African-American leadership in local political contrary to expert a redictions immediately after Katrina. In late 2007, however, C. v Council becomes majority white.

Women, di proportionately front y ealthy i prown bac grounds, organize groups such as Citizens for 1 Creater New Orleans, levees.org, and Women of the Storn, urging reform in the engine align, unit cation of levee boards, elimination of multiple tax arm sors, and congressional attention to pook Katrina (New Orleans. Their success recause women of Progressive Era who led fight for drainage, potable water, and municipal improvements a century earlier.

Summe ... 06 Two surveys is late n... 1-2006 pop lation of New Orle... at 200,725 and 223,388, down from 457, ... 70 im is likely prior to Hurriane Katrina. One survey estimates new recipi composition as 47 percent black (down from almost 70 percent in 2000). -42.7 percent white (up from 2° percent), and 3.5 percent Asian; those 'Hispani oth licity (regardless of race) comprised 9.6 percent, nearly trip'e their relations size from before recirina. U.S. Census Bureau's American Community Survey, using difference nethodology, determined city's racial recipieup as 59 percent black, 37 percent white, 3 percent Asian, and 4 percent Hispanic of any race. Differing regures reflect "soft" nature of city's postdibut an population, and difficulty of measuring it.

August 29, 2006 First anniversary of storm is marked w. wide range of civic remem-

brances. Worldwide ... ws outlets return for update on city's progress—likely to become annual media ritual.

- September 2006 Fulton street pedestrian mall opens off lower Poydras Street, designed to give visitors a reason to patronize Warehouse District venues and Hanah's Compo, rather than explore traditional French Quarter/Bourbon Circet circ v.c.
- Fall 2 100 FEM a trailers to report transform cryscape of flooded region, reading their neak numbers a year after storm. Tharly 19,000 white tin boxes do. Or leans Parish, plus over 20,000 in adjacent areas, offering flood vicings a convenient but cramped place to dwell as they repair their homes. Progress in rebuilding and concerns over forms dehyde cut trailer usage in half by early 2003.
- 2006 2007 Array Corps erects massive closable gates at the of Sulfall canals to prevent typeat of surge-induced levee breaches during Katron. Long recommended by Army Corps but resisted locally for real of inhibiting canals ability to remove runoff, gates represent significant in provement in flood protection for alkeside areas. Special by-pass pumps are installed to allow or rainwater runoff removal if gates are closed for impediating storm. Inductival and MR-CO canals in east 1 m in ungated.
- La. 2006-Early 2007 Overlapping and so notimes competing a ban-planning efforts, led by the City Council-hired Lambert/Dalzey fires and the privately funded United New Orleans Plan (UNOP), help citizen a busy with numer our neighborhood meetings and planning characters.
- Late 2006-Early 20 07 With returning chizens comes a small but extremely violent number of criminals, reworking flood an ected disordistribution economies and give ster turf. While the city's reformed population doubles between last quarties of 2005 and 2000 murders and overall colent crimes increase nearly site of Murders of two particularly initially engaged citizens—a black male music teacher and a wine female filmmal error incite a massive Manch Against time on January 11, 2007.
- **206.** 2007 Canal Street is refurbished with granite sidewalks, palm. rees, and other improvements, with aim of restoring array's commerce and grandeur.
- 2006-2007 Storm-related bankr up cies, lack of affordable housing and migrant-worker influx contribute to ourgeoning homeless population. Closure of downtown shelters shifts go graphy of homelessness to lear aguered Ozanam Inn on Camp Street, the Wall" at Elysian Fields levee and to makeshift encampment under Dunc in Plaza gazebo. Squatter color yor over 150 homeless people, camped immediately outside City Hall, form a striking statement on social problems of antilluvian city.

- Lo tisia ta "Road Home" I togram distributes hallons of tecloral dollar to Katrina nood victims: \$15() nd per eligible homeowner, tinus insurince settlements to and FEMA grants. Homeowners suffering great at han 50 and cent damage opt to (1) repair to rebuild in place; (2) sell to state and purchase another home in Louisiana or (3) sell to state and choose not to remain momeowner in Louisiana. Lengthy and slow-moving puperwork process in rages citizenty, delays rebuilding decisions, and doo in Gov. Katalien Blanco's reelection efforts. As of stomasses second anniversary, less than one-third or the 140,000 eligible applicant closed on their patrions.
- Plans for a signatic medical contribution of pushing it w LSU and Veterans Affairs hospitals promises economic development at 1 lealth services for city, but also threatens demolition of near at litty blocks of historic Third ward near Conal/South Galvez intersection. Plan dis resses preservation to, but opposition is muted because of universally acknowledged importance of heart care to city's recovery.
- Summe. "07 Population of New Orlean, estimated around 273,000, vita thousands more living "between places" as Fload I. The monies trickle in a flood victims' pockets and rebuilding decisions are finalized. Other estimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,0,000 to the restimate put city's July 2007 population at under 2,
- August 2007 East Bank population centroid (theoretical carter of balance among the distribution of boust holds), located in the central Coventh Ward in 2000, shifts by August 2007 a mile to the southwest into the central Sixth Ward. Westward mover care effects slower return rates east of the Industrial Canal, while

the southward move, ant signifies much higher return rates of the unflooded "sliver by the river" compared to heavily flooded lakeside neighborhoods.

- Summer 2007 Three key entities—Army Corps, New Orleans Sewerage and Water Board, and Jen'erson Parish—agree to relocate pumping stations for the 17<sup>th</sup> Street, Orlean and Landon Avenue outfall ranals from their historical inland for actions which manifest the city's edge when they were installed a centurago), to may, higher a kefront locations. This would keep them out of foodprone to rlands, and who for modernization, and most importantly, enable mem to continue purpoing runoff into Lake Pontchartrain even when no a storm gates an outfala are closed for oncoming hurricanes. Rare results agency consensus constitutes first step to a seeking funding and eventually execution, new plant.
- Late 2. 107 Localism enjoys rare victory, wer national and good all forces as Thibough chased it is sess grocery chair, known for its Louishing foods and regional suppliers, takes over Savia-Center supermarkets. Change shows city's food retail industry back into local lands, a position of the enjoyed by locally owned convergences until Winn-Dixie and Wal-Mark moved into market in late 130 Js-early 2000s.
- 2007- C. ward Army Corp. promises nearly \$15 bit ion work of improvements to region's flood control system over next four to five pars, to a sure protection from storms with a percent chance (the curring in any given year. "Hundred-year protection of an" entails gating of outfall and navigation canals, raising of existing levels heights to account inclusing sizes and subsidence, construction of new levels, installation of pringing statement to allow for removal of inderior rung in hile gates are closed, and rejute themer to weak spots in existing floodwalls and levees. Projections And year of on region-wide search for hundled million cubic yards of clay preceded for the construction. If the ded appropriately, effort will prove critical to future or region—but will fall short of "raying" it if not parallered by qually aggressive coastal restoration.
- 2007-O v rd New housing chologis in flood-a dected zone alters consinventory of building methods. Advances in "sticel and" (wooden frame) houses make wood more resistant to termites mold, and wind; new poured on-site concrete walls provide additional strength and insulation; "green building" becomes trendy buzzword. Modul r homes built off-site in factories and assembled rapidly on location, reduce costs but uso design options while circumventing local craftsmen. Stylicially, debate rages between mode nists and traditionalists on whether post illuvian city should exhibit lates anternational trends in architecture, or respect traditional local aesthetics
- **November 8, 2007** Louis and enjoys productive day ir Asnington. Passage of Water Resources Development Act (over presidential reto) deauthorizes MR-GO

Canal while authorizing (but not yet appropriating) about \$7 billion for Louisiana coastal restoration, levee construction, and related projects. Same-day passage of defense-pending bill allocates \$3 billion toward shortfall in Road Home monies, ensuring homeowners will be reimbursed for federally caused floor damage.

- Late 20°, Voting 1 % crds from 2003 and 2007 gube. Patorial elections reveal that b'all voters in Prieans Part. In declined by over 54 percent (84,584 to 38,738), Thue white veters declined by 27 percent (46 669 to 33,937). Studies show that New Orleans will remain majority African-American, but by slimmer margin that the fore states.
- 2007-2008 Army Corp. releases flood-riser aps showing how "hundred-year protection plan," promised by 2011, vall affect greater New () neans. I same by-basin maps depict likely flood depth produced by medium to extreme storms valder values a scenarios, including before Katrina, in the present day, and after 2011, and with 0-, 50-, and 100-percent pumping capacit, poest-case scenario inductes light flooding in some low-lying subtribants belivisions; poest-case scenario shows severe deluges in anost below-sea-lane areas whost likely scenario shows marked improvements since 2005. May are ain or at helping residents understand that rish is not evenly distributed spatially, nor can it be eliminated entirely. Reveningly, Army Corp. Thames numicane protection levee system "Greater New Orleans Hurricane and Sorm Damage Risk Reduction System."
- Thousands of the oded properties beinght out from hor year ners through Road Home program face uncertail future. Progreties may eventually be turned over from a sate to New Orleans. Redevelop a ent Authority (NORA), which will opt to repair or rebuild and in "Lot next Doo" program, in which homeowrem may purchase adi, cent parce of NORA must decide similar fate for 10,000 blighted houses and possibly 15,000 additional substandard houses, putting city agency in the argument of programs.
- Wir te :-Spring 2008 B. W. Cooper, C. J. Peete, St. Bernard, and Lafitte bousing projects are demolished and prepared for mixed income redevelops. T.t.
- April 2008 Catholic archdiocesc corganization pastoral, social, the educational services to accommodate power-Katrina residential settlement, patterns, incoming Latino immigrants, heavy uninsured storm damages and declining number of priests. Reorganization leads to closure and consolidation of thirty-three parishes, some dating to antebellum times. Some congregations are merged with nearby churches, whose proximity is traceable on nineteenth-century ethnic settlement patterns.

**April 2008** As Mississippi R. er nears flood stage (seventeen feet above sea level) at Carrollton Gauga A.my Corps opens Bonnet Carré Spillway for ninth time since its install tior in 1930s, and first time since 1997.

Ongoing Hurricane Natrina story places New Orleans at center of nationwide and work wide in allectual liscourse on hotly concested topics, including global narming, ust an resilience and sustainability, disaster preparation and as sponse, as propriate rule of government rate relations and poverty, and the future of old coastal cities. Countles post-Katrina symposia, confirences, jour, als, books documentaries, and political dialogues render city part warning part testbal, part metaphor, part p-ophet, and part inspiration.
